
How much disk space is required for Oracle Data Pump?

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

How can I determine how much disk space is needed for using Oracle Data Pump export?

Answer

Run check

```
expdp $ALEPH_ADMIN ESTIMATE_ONLY=y full=y
```

Additional Information

1. Please make sure, that ALEPH_ADMIN has the relevant permissions to execute java:

```
s+ ALEPH_ADMIN  
grant JAVA_ADMIN to aleph_admin WITH ADMIN OPTION;
```

2. Take a note that full=y is not working in Oracle 11.

You might alternately run the following check for each of the libraries:

```
expdp <lib> ESTIMATE_ONLY=y NOLOGFILE=y
```

Example

```
expdp abc01/abc01 ESTIMATE_ONLY=y NOLOGFILE=y
```
