
Delete all patrons from Aleph test system including claims, loans etc.

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

How can we delete all patrons except 12, including claims, loans, etc., from our Aleph test system?

Answer

Use service 'Delete Patron Records (cir-23)' This service can use an input file with ID numbers.

Possible solution:

1. Create an input file with all IDs currently in the system with help of SQL query and spooling it into a text file.
2. Remove all IDs that should be kept from this text file
3. Use this file as input for service cir-23, choosing the "Override for all attached transactions" option in the submission.

Tip: run with 'Update Database =N' first.
