

tab100-switch HOLD-FULFILL-NOTIFY

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

In which scenario is HOLD-FULFILL-NOTIFY relevant?

Answer

This switch sets up the behaviour when

- Patron Direct Queue (PDQ) and Title Requests are used
- An item is transferred to another sub-library using the "Manual Transfer"-option in GUI Circulation

The switch is not checked in other situations.
