

UNIMARC

How can UNIMARC control fields be edited?

Alma as a multi-format library solution supports UNIMARC form editing for 1XX fields for ease of use by cataloging staff. Similar to the MARC 21 form in the MD Editor for editing the LDR, 008 etc. control fields, form editing capability is available for the following UNIMARC control fields. See below for some form examples:

Working on -. (99131123909901101)

LDR	#####nam#22#####450#				
010	\$\$a				
035	\$\$a				
100	<input type="checkbox"/>	Date entered on file (0-7)	20151217	Type of Publication Date(8)	Publication Date 1 (9-12) u##y
		Publication Date 2 (13-16)	0eng	Target Audience Code(17)	Target Audience Code(18)
		Target Audience Code(19)		Government Publication Code(20)	Modified Record Code(21)
		Language of Cataloguing (22-24)	##b	Transliteration Code(25)	Character Set (26-27)

105	<input type="checkbox"/>	Illustration codes(0)	# - value	Illustration codes(1)	# - val	Illustration codes(2)	# - value
		Illustration codes(3)	# - value	Form of contents codes(4)	# - val	Form of contents codes(5)	# - value
		Form of contents codes(6)	# - value	Form of contents codes(7)	# - val	Conference or meeting code(8)	0 - not s
		Festschrift indicator(9)	0 - not a	Index indicator(10)		Literature code(11)	
		Biography code 4(12)					

Does Alma support UNIMARC authority records?

As a multi-format library solution, Alma supports the use of UNIMARC authority records for the purpose of authority control.

Alma also provides the capability for managing UNIMARC local authority records. From the Metadata Configuration List page, you can create your own UNIMARC authority profile for managing local authorities.

In addition, you can create authority record import profiles designed to import UNIMARC records.
