

## Search via direct index in ILL library

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Question

Can the Browse/Search function in another library's database be performed in the ILL module directly, not via z39.50 ?

### Answer

The Browse/search function in the data base of the other library should be performed via z39.50 mechanism and not via direct index since the bib information is not transferred properly to the ILL request when you use the Direct index.
