

## How do I set up patron self-registration for Aleph?

- **Product:** Aleph, Primo
  - **Product Version:** Aleph 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

How do I set up patron self-registration for Aleph with restful-API?

### Resolution

Aleph supports self-registration via a RESTful API per ADM library:

<https://developers.exlibrisgroup.com/aleph/apis/Aleph-RESTful-APIs/New-Patron>

<https://developers.exlibrisgroup.com/aleph/apis/Aleph-RESTful-APIs/Patron-Registration/>

It is now possible to create a new patron using a new DLF API: <base-URL>/patron. Discovery interfaces can now use the new DLF API to allow patrons to register themselves to Aleph and to receive library services. Self-registered patrons have permissions according to the library's policy. If the authentication process is using single sign-on, authentication for Primo is possible as well.

Please see Aleph 22 release notes for further details:
