
ACQ module, trigger list

- **Product:** Aleph
 - **Product Version:** 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

In the help for serial-44 service the following can be found:

====

Create Triggers?

To create a trigger for each claimed issue, choose Yes. You can use the Triggers List to easily call up each claimed issue. In the Triggers List, highlight a line, and click Select to move to the relevant record. When you go back to the Triggers List, the record you selected will still be highlighted.

====

Where can the triggers be found?

Answer

Please find attached a screenshot which shows where to find the [Trigger list](#)
