

## ARC, invalid collection information

- **Product:** Aleph
- **Product Version:** 22, 23
- **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care

### Question

In query studio, cash package some curious collections are displayed like ...

Where do they come from?

### Answer

the provided data is collected from various Aleph tables that include the collection field, e.g.

Z38\_FILTER\_COLLECTION

-----

#

100FM

100MR

100ZM

Z30H\_COLLECTION

-----

000

100FG

100FM

100ZL

100ZM

100fm

100fz

100zm

This data can't be cleaned in ARC but only in Aleph.
