

How can I add cleanup procedures to the job daemon?

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

I would like to automate clean up of directories holding temporary data such as print, scratch, files. How can I add these procedures to the job daemon?

Answer

Follow instructions of document [How_to_add_UTIL_X_to_the_job_list.doc](#)

Additional Information

The document was created for Aleph 20 but is still valid for higher Aleph versions.
