

## Why a package is not active after P2E?

- **Product:** Alma
  - **Product Version:** July 2016
  - **Relevant for Installation Type:**Dedicated-Direct
- 

Q: Why a package is not active after P2E?

A: Check for the following:

1. Package have a URL added to the "Electronic Collection Level URL" - If there is no URL the package will be marked as not active
2. Package "Additional descriptive information" is linked to a BIB - If there is not BIB, the package will be marked as not active
3. The BIB is not suppressed from publication - If the BIB is suppressed, the package will be marked as not active
