

Functionality Record's trigger

- **Product:** Aleph
 - **Product Version:** 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

How to set a trigger for a specific record and how to show a list of triggers?

Answer

The list of memos for a specific record is displayed when using pull down menu "Edit Actions -> Record's Triggers".

When opening "[M] Memos" you may search for triggers by filtering for a specific timeframe or a special department the trigger is assigned to.
