

Ex Libris hosted server lacks "git" package

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct
-

Description

Local staff want to use the "git" package on an Ex-Libris-hosted server. (Git is a version control system that is used for software and script development.)

Resolution

Git is not part of the standard server software, but it can be and has been installed. Create a request that the Cloud Production team to install it.
