
Ulrichsweb: Security Warning When Accessing Title Details Page

- **Product:** Ulrichs
-

How can I stop the Security Warning prompt in Internet Explorer 8 from coming up every time I try to access the Ulrichsweb Title Details page?

If you are using Internet Explorer 8, you may see a Security Warning that says, "Do you want to view only the web page content that has been delivered securely?" every time you attempt to access the Ulrichsweb Title Details page.

In order to de-activate this Security Warning, please follow these steps:

1. Click on the **Tools** menu.
2. Select **Internet Options**.
3. Select the **Security** tab.
4. Click **Custom Level**.
5. Scroll mid-way down to the **Display Mixed Content** section.
6. Select the **Enable** radio button.
7. Click **OK**.
8. When prompted with "Are you sure you want to change settings for this zone?", click **Yes** button.

The Ulrichsweb Title Details page contains "mixed content" (that is, there is both SSL-secured [https] and non-SSL-secured [http] content), so enabling the display of Mixed Content will deactivate the Security Warning prompt.
