
360 Link: XML API

- **Product:** 360 Link
-

Where can I find information about the 360 Link XML API?

The 360 Link XML API allows libraries to build custom OpenURL linking solutions. The API provides a method for library tech teams to receive XML-formatted results of OpenURL queries against their electronic holdings, allowing them to display these results in whatever format they choose.

Please see the following articles using the 360 Link XML API:
