## Ulrichsweb: Downloading Large Amounts of Data

- **Product:** Ulrichs
- 

---

### How do I download results greater than 100 in Ulrichsweb?

When you do a search in Ulrichsweb, the Search Results can only be displayed and downloaded up to 100 results per page. You can download more than 100 results on multiple Search Results pages.

To select and take action on results from multiple Search Results pages, you may select results on a page and then move to the next search results page using the directional arrow. Select results on that page, move to the next page, and so on. Ulrichsweb will remember what you select on multiple Search Results pages. When you are ready to take action on your results - for example, View Details, Email or Download - Ulrichsweb will include all of your selections in that action.

---

#### **Note**

You can download a maximum of 500 records at one time.
