
Serials routing lists printing error

- **Product:** Aleph
 - **Product Version:** 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

When printing a routing list slip the address field is sometimes not correct. Of the user has an address which has less than 4 lines the lines are filled up with information from the next routing list participant.

Resolution

Change the following line in `./nnn01/form_lng/serial-rout-list.xml` ...

```
<xsl:call-template name="patron-address"/>
```

...to ...

```
<xsl:call-template name="patron-address-direct"/>
```
