

Leganto Release Notes December 2016

New and Changed Leganto Features

The following features are new or changed in this month's release of Leganto.

Several new features are part of an ongoing initiative that implements copyright compliance functionality. All features are scheduled to be complete by the January 2017 release.

Reports Tab

A tab was added to Leganto containing analytical information about your reading lists. Information is included for:

- Reading lists for courses for which you are an associated instructor
- Reading lists for which you are owner/collaborator

The information is divided into three sub-tabs:

- **Usage** - Student usage information about active, published reading lists. Also see the **Analytics** sub-tab.

Course Code	Course Name	List Name	Start Date	End Date	Total Citations	Participants	Active Students	Activity Score	Total Access	Total Comments	Total Uses	Total Read
ARTH432a	Art History 101	History of Europe	May 03, 2015	Jul 10, 2016	9	18	5	12%	34	16	9	16

Reports Tab

The tab contains the following information:

- General information for each reading list:
 - **Course Code**
 - **Course Name**
 - **List Name**
 - **Start and End Date**
 - **Total citations** - The total number of citations
 - **Participants** - The total number of students
- Total usage for each reading list:

- A line chart of weekly usage for each reading list

Additional Leganto Features

~~The following additional features were changed or added in this month's release.~~

- ~~• In the section menu, the option **Import RIS File** was changed to **Import**. You can select the file type on the dialog box that appears. Currently, RIS is the only file type available.~~

Note

This feature was originally added to the release notes, but the feature is not yet ready.

New and Changed Alma Configurations

For additional Alma changes related to Leganto, see [Fulfillment - December 2016 Enhancements](#).

- The new customer parameter **permalink_login** configures the kind of login method used by reading list permalinks. For more information, see [Configuring Reading List Publication Options](#)

Resolved Issues

The following issues were resolved in this release:

- (URM-58302) Citation details sometimes overflowed the citation borders in IE (no word wrap). This was fixed.
- (URM-58303) bX recommendations were sometimes only partially displayed. This was fixed.
- (URM-63929) Chapter Information did not appear in the reading list page. This was fixed.
- (URM-64374) There was a problem positioning the cursor when editing a section. This was fixed.
- (URM-64535) The page/next/previous buttons appearing over a long list of physical items were incorrectly positioned as vertical in the UI. This was fixed.
- (URM-64555) When there was a long list of suggestions in the right pane, the due date would be pushed off the screen. This was fixed by moving the due date above the list of suggestions.
- (URM-64593) When viewing Leganto on an iPad, the display sometimes froze when clicking a citation in a reading list. This was fixed.
- (URM-64631) No date available information appeared for citations with upcoming copyright availability. This was fixed.
- (URM-64740) The material type was not copied when duplicating a list (citations defaulted to Book). This was fixed.
- (URM-64982) When trying to drag a citation by the title, the citation was opened instead of dragged. This was fixed. An additional reported issue will be fixed in a future release.
- (URM-66377) In a previous release, the parameter to change the header color was changed to only change the bottom line of the header and not the entire header. This was supposed to also affect the Login page, but it did not. This was fixed.

January Sneak Peek

Features scheduled for January 2017 include the following:

- Creative Commons licensing - Associate a citation with a creative commons copyright license.
- Alma upload file to citation - Enable upload/manage citation-related files in Alma.
- Export citations in RIS format - Enable exporting reading list in RIS format from Leganto.
