Question

We inserted the 15.08.2016 as a closing day in our calendar on the institutional level but the due date for checked-out items today is in fact the 15.08.2016

Answer

In the Calendar Management page (Administration>General Configuration>Configuration Menu>Libraries>Add Library or Edit Library Information) many Exceptions (as the one for the August 15) are set with dates "Valid from" xx/xx/2016 to "Valid to" x/xx/2026.

- This is not correct, the "Valid To" year has to be 2016 and not 2026.
Currently, it is not possible to set a calendar exception as a recurring event. The administrators have to add/edit an exception for every year individually.
