

Leganto Release Notes December 2016 - HF

Resolved Issues

The following issues were resolved in this hotfix release:

- (URM-66275) Some citations were missing the View Online link for guest users. This was fixed.
- (URM-66377) In a previous release, the parameter to change the header color was changed to only change the bottom line of the header and not the entire header. This was supposed to also affect the Login page, but it did not. This was fixed.
- (URM-67008) Some instructors coming from the CMS could not edit their reading lists. This was fixed.
- (URM-67237) View Online links did not appear in Internet Explorer 11. This was fixed.
- (URM-67286) The Email Leganto notifications to users job failed frequently since the November release. This was fixed.
