

## Is there a mobile page or version for WebVoyage?

- **Product:** Voyager
  - **Product Version:** all
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Question

Does Voyager have a mobile app, setting or view to adjust the OPAC for mobile users?

### Answer

The skins distributed for Tomcat WebVoyage are designed for desktop display. A mobile skin is not available by default.

Some sites have built their own mobile skins for WebVoyage. Customers interested in doing the same may wish to [query Voyager-L or search the listserv archives](#) [external site, login required] for any information about this process that those sites have shared with the user community.
