

How to validate our METS file against the Rosetta METS Profile?

- **Product:** Rosetta
 - **Product Version:** v5
 - **Relevant for Installation Type:** Local
-

Description

In order to configure METS files to be successfully ingested into Rosetta they must be validated against the Rosetta METS profile.

The following information will help you validate your METS files against the Rosetta METS Profile.

Resolution

Customers can use the Rosetta XSD file to do the validation:

https://github.com/ExLibrisGroup/Rosetta.dps-sdk-projects/blob/master/current/dps-sdk-projects/dps-sdk-deposit/src/xsd/mets_rosetta.xsd

Additional Information

For more information about the Rosetta AIP data model:

https://knowledge.exlibrisgroup.com/@api/deki/files/78233/Rosetta_AIP_Data_Model.pdf

The Rosetta METs Profile registered with the Library of Congress:

<http://www.loc.gov/standards/mets/profiles/00000042.xml>
