

How do I disable requests via WebVoyage?

- **Product:** Voyager
 - **Product Version:** All
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

How do I disable requests via WebVoyage?

Answer

The following will disable all patron requests.

1. Edit the `webvoyage.properties` file in `/m1/voyager/yyydb/tomcat/vwebv/context/vwebv/ui/{skin}`
2. Set `option.patronRequests=N`
3. Save changes.
