

How to disable the self registration link in the Deposit Module's login screen

- **Product:** Rosetta
-

Description

How do I disable the self registration link in the Deposit Module's login screen?

Resolution

1. v5.2 or higher with Local Authentication:

- Login to the Administrative module and go to: Home > General > General Parameters > Module: authentication
- Change the "deposit_self_registration" parameter to 'false'
- Click "Update" to save.
- Logout of Rosetta Management
- Clear your browser's cache
- Connect to the Deposit module's login screen (e.g. http://<your_dns_name>:1801/deposit) to confirm that the registration link is gone.

2. v5.1 or lower with External Authentication (e.g. SAML, LDAP, etc.):

- Connect to the Rosetta application server(s) via ssh and navigate to: `/exlibris/dps/d4_1/pds/html_form/calling_system-dep/login`
- Comment out the following lines:

```
<!-- <div class="register">
    <ul class="clearfix">
        <li class="clearfix">
            <label class="registerMessage" for="username">I am new and want to
register:</label>
            <div class="registerButton">
                <a class="registerText" target="_parent" href="http://il-dps01.corp.exlibrisgroup.
com:1801/deposit/external/register.do?operation=Details" title="">Register</a>
            </div>
        </li>
    </ul>
</div> -->
```

or

```
<!-- <ul class="newRegister clearfix">
<li><span>I am new and want to register:</span> <span class="buttonLink alignRight"><a target="_parent"
href="http://il-dtldev08c.corp.exlibrisgroup.com:1801/deposit/external/register.do?operation=Details"
title="">Register</a></span></li>
</ul> -->
```

c. Save your changes.

d. Clear your browser's cache

e. Connect to the Deposit module's login screen (e.g. http://<your_dns_name>:1801/deposit) to confirm that the registration link is gone.

NOTE: upgrading to v5.2 or higher won't overwrite these changes.
