

Leganto Release Notes February 2017 - HF

The following issues were resolved in this hotfix release.

- (URM-69985) When adding user-defined tags to My Collection (see [User-Defined Tags in My Collection](#)), the dropdown box was limited to 10 lines. This was fixed, and now all lines are visible.
- (URM-70419) In the February release, notifications were enabled by default for all students. Set the new customer parameter **email_notifications_group** to **STAFF** (instead of **ALL**) so that only instructors receive notifications (and not students). When set to **ALL**, students and instructors receive notifications from Leganto. See [Configuring Whether Students Receive Notifications](#).
