

Can javascript be added to Summon?

- **Product:** Summon
 - **Product Version:** Summon 2.0
-

Question

Can javascript be added to Summon?

Answer

Yes. A custom, external javascript file can be added to the Summon 2.0 interface.

To apply javascript, do the following:

1. Go to the Summon Administration Console,
2. Scroll down to Summon 2.0 External Script
3. Click the slider bar changing it from Default to **Custom**
4. **Enter the full path of your external javascript file**
5. **Save**

Additional Information

See [Summon: Administration Console: Settings](#)
