
Number of loans including pre-migration loans in Alma

- **Product:** Alma
-

Description

Where in Alma can you see the total number of loans, including loans migrated from the previous (legacy) system to Alma?

Resolution

There are two places:

- In Alma Search results: from an All titles, Physical titles, or Physical item search, you find the loan statistics when clicking the 'Other details' link. Note: from All titles and Physical titles the loan statistics represent **total** for all items whereas the Physical item loan statistics are specific to the **single item**. Additionally, statistics are not available for migrated loans if the title has more than 1,000 items.
- In Alma Analytics, data concerning migrated loans appear in the Fulfillment subject area in the **Loans** and **Times Loaned** fields if the loans are mapped to these fields during implementation and the item has a loan in Alma. Otherwise, loan statistics for migrated loans are found only in the Physical Items subject area.
