## How to Correct Primo Central's/Google Scholar's Holdings File?

- **Product: Alma**
- 

### Description

There seems to be some incorrect/non-updated information in the electronic holdings file published from Alma to Primo Central/Google Scholar.

Examples:

- Deleted Portfolio is still included in the file.
- Journal coverage is not updated

Why this information is not being updated by the weekly publishing job?

How can the file be corrected?

### Resolution

This can be fixed by running full publishing to Primo Central/Google Scholar.

Since publishing to Primo Central is incremental, it will only update records that were updated since the previous publishing.

For full updating of the file, contact Alma Support and ask to run publishing to Primo Central/Google Scholar in full mode.
