## Blocks aren't enforced for particular patron

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

Even though the xxx50 tab\_block\_circ says that the patron should be blocked for x number of overdue or recalled overdue loans or xx dollars of fines owed, the patron is still allowed to borrow and renew items.

### Resolution

#### *Cause 1:*

One or both of the following lines, saying that tab\_block\_circ should be consulted, are not included in the xxx50 tab\_check\_circ:

```
RENEW-WWW check_circ_9_a  
RENEW-WWW check_circ_9_b
```

#### *Cause 2:*

The patron's xxx50 z305 (local patron) record has a value of "N" for z305\_loan\_check. {z305\_loan\_check "determines whether or not the system should check for blocks when a patron borrows (or renews) an item."}
