

Leganto Release Notes August 2017

New and Changed Leganto Features

The following features are new or changed in this month's release of Leganto.

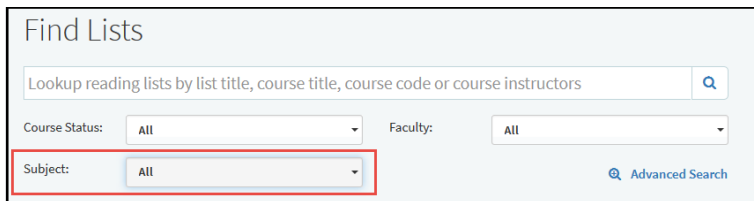

Reading List Subjects

You can now add subjects to reading lists, the same way that you add tags to sections and citations. Unlike tags, subjects are pre-defined by Ex Libris. Click **Add Subjects** to start adding subjects; if you already defined subjects, click the edit icon to edit the subjects. Enter a letter or two and select a subject from the drop-down list. Click **X** to the right of the subject to remove it. When you are done, click **Save**.

Add Subjects to Reading List

A **Subject** filter was added to the Find Lists page.

Find Lists Page

The subjects are as follows:

Aeronautics	Aesthetics	Agriculture	Air Force	Almanacs
Anarchism	Angling	Animal Husbandry	Animal Science	Anthropology
Aquaculture	Arboriculture	Archaeology	Architecture	Archives
Armor	Army	Art	Artillery	Astronautics

Socialism	Social Pathology	Social Problem	Social Reform	Social Science
Society	Sociology	Statistics	Surgery	Technical Chronology
Technology	Theosophy	Therapeutics	Transportation	Visual Art
Women and Sexuality	Writing	Yearbooks	Zoology	

Additional Leganto Features

The following additional changes were made in this month's release:

- When adding a section to a reading list, the section is now added to the end of the list (instead of the top). When duplicating a section, the section is added after the one that is being duplicated. This behavior can be configured by an Alma parameter; see [Additional Alma Configurations](#).
- When exporting a reading list to a PDF, the PDF now contains section and citation tags, as well as the public note.
- When adding or editing a citation, the field **Notes** was moved to **More Item Details** and was changed to **Resource Notes**, in order to distinguish it from the citation's public note. This field name was also changed on the Citation page.
- When enabled by your library, you can now include search results without full text access when searching for items in Primo Central.

New Alma Configurations

The following features were added to Alma to support Leganto features in this release.

For additional Leganto-related Alma changes in this release, see [Fulfillment - August 2017 Enhancements](#).

Additional Alma Configurations

- You can now integrate Leganto with Google Analytics; see [Enabling Google Analytics](#).
 - You can configure where in a reading list newly created sections appear; see [Configuring Where New Sections Appear](#).
 - The **Upload** button on the Branding Management page was changed to **Save**; see [Configuring Leganto Branding](#).
 - You can enable Leganto users to include results without full text in Primo Central search results; see [Configuring Search Repository](#).
-

Resolved Issues

The following issues were resolved in this release:

- (URM-72537) Clicking Associate to DCS resulted in an error. This was fixed.
- (URM-72562) Some duplicated wording was removed from Creative Commons license information.
- (URM-72701) When moving a citation within a list, the last updated date is now updated.
- (URM-73183) The Welcome pages were missing descriptor text for accessibility purposes. Text was added to these pages.
- (URM-73421) The resource icon graphics were of low quality. They were fixed.
- (URM-74331) There were several small formatting issues when exporting a reading list in Harvard style. These were fixed.
- (URM-74593) The fonts in the "Appears in other reading lists" popup were inconsistent with the UI. This was fixed.
- (URM-74762) Sorting reading lists by course name did not sort correctly. This was fixed.
- (URM-74865) The source URL for a web page citation did not appear when exporting a reading list in APA format. This was fixed.
- (URM-75375) When adding a citation in Leganto using a library search, pages information (300 \$a) was not inherited. When editing the citation for copyright, the total pages value remained empty. This was fixed.
- (URM-75604, URM-75761) There were some UI issues and a translation issue when viewing a reading list with the UI language set to Hebrew. These were fixed.
- (URM-75753, URM-75794) Some grammatical errors were fixed in the UI.
- (URM-75791) The last character in a public note was partially covered by the graphic. This was fixed.
- (URM-75854) In some situations, citations or sections overlapped in the UI. This was fixed.
- (URM-75905, URM-76116) There were some thumbnail resolution issues. These were fixed.
- (URM-76982) Text book links for citations originating from ProQuest eBook Central were not working. These were fixed.

Next Month Sneak Peek

Features scheduled for next month include:

- Archive reading lists
- Edit course code in Alma
