
Diacritics from ACQ pub patterns don't display in WebVoyage

- **Product:** Voyager
 - **Product Version:** 7.0.1
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Symptoms

Serials issues with diacritics do not display diacritics in WebVoyage

Defect Status

VYG-4510 is currently in Development.

Replication Steps

1. In Acquisitions > Serial Check-in, find or create a publication pattern with a chronology that includes diacritics – i.e., Months in French.
2. Apply this publication pattern to a serial component and check in a few issues, including at least one that has a diacritic in the chronology abbreviation.
3. Find this title in WebVoyage and view the record. Notice that the diacritics in the checked in issues do not display

Workaround

None; or collapse issues so individual months do not display.
