

Add a role to all users with a specific user group

- **Product:** Alma
-

Description

We want to add a role to all users with a specific user group. How can we do it?

Resolution

1. Create a set of all users with the required user group.
 2. Go to Admin > Run a Job and select the 'Update/Notify users' job.
 3. Select the set of users you created.
 4. Check the 'Add role' box and select the desired role from the dropdown menu.
 5. Run the job.
