

API call limitation Sandbox

- **Question**

Does the API call limitation also considers calls to the Alma (Standard) sandbox?

Or are these counted separately?

- **Daily API Request Threshold**

The Daily API Request Threshold permits 1000 API calls per number of named user licenses per day (the threshold is not per-user basis - it is enforced against the aggregate of all API calls made by the institution in a 24 hour period). For example, for an institution with a 100 named users license, the Daily API Request Threshold is 100,000 requests (100 named users X 1000 calls = 100,000 daily requests). If the number of API requests exceeds the daily threshold, an error is returned for any additional API request

-

Answer

The threshold includes calls to the sandbox. It is expected that, being a test environment not many calls will be made.

Product: Alma
