

Vendor Analytics tab

- **Product:** Alma
-

Description

In September 2017 a new tab was added to the vendor details in the UI. It is called "Analytics" and contains a report "Vendor performance for orders created in the last year".

Where does this report come from, and how is the "last year" defined?

Resolution

The report is an Analytics report stored in this folder:

shared folders > Alma > acquisitions > reports > Vendor performance for orders created in the last year

It contains dates from the last 12 months, starting today's date minus one year.
