

## Patron notice lacks updated text

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

We added a sentence to patron notices about the library hours but this sentence is *\*not\** appearing on the notice the system generates.

### Resolution

This could be caused by:

- 1) the form which was changed not being the form which was printed
- 2) an error in the form parameters (in one case the added line had " <xsl:with-param name="le"... " rather than the correct " <xsl:with-param name="line"... ")
- 3) failure to run util i/6 in order to produce a new ./form\_Ing/html.pck file
- 4) failure to restart the GUI client in order to pull the new html.pck file over to the pc. (Check ./Alephcom/files/xxx50/PrintTemplates/Ing to see whether the updated file has been brought to the PC.)

Note: the following search in the Knowledge Articles will retrieve other articles which may be relevant: form\_eng AND html.pck .
