

Primo VE November 2017 Release Notes - HF

The following issues were resolved in this hotfix release:

- (URM-78323) Folders in Primo and Alma Analytics were getting crossed when switching between Primo and Alma Analytics. This has been fixed.
- (URM-81261) Restricted search results not displayed while on campus (by IP) for signed-in users. This has been fixed.
- (URM-81345) Title names displayed incorrectly when opened via OpenURL. This has been fixed.
- (URM-81937) In some cases, the Services page did not display a thumbnail for the record. This has been fixed.
- (URM-82345) A record's full display did not display correctly on mobile devices running IOS 11. This has been fixed.
