

## How to install a SAML tracer in Firefox?

- **Product:** Cross-Product
- 

### Question

How to install a SAML tracer in Firefox?

### Answer

---

#### Note

The following procedure will install a 3rd party, open source product, on the work station.

---

1. On Firefox Menu, click "Add-ons".
2. In the page that opens, use the search box to find "saml tracer". Install the first add-on in the result list.

After the installation; when using SAML for authentication while the add-on is open, it will track all requests made in the window.
