

## Expiration Alert Period

- **Product:** Alma
- 

### Description

There is a policy "Expiration Alert Period" in the "User Registration" terms of use. How is it supposed to work?

### Resolution

In the "Expiration Alert Period" you define a number of days. In "Manage patron services" for actions like loaning an item you will see a warning if the user record will expire within x days.

Note that this is about the expiration of the user record and not about the expiration of the patron role.
