
UTIL Menu: Running a keyword regen

Duration: 5:18

| | |
|------------------------|--|
| Description | This video shows the steps for running a keyword regen on your database from the Voyager Utilities menu. If you'd like to check to see if a regen is needed, or would like to start a regen on your own, this video will give you the (easy!) steps to run the job with confidence. Start your regen in under 5 minutes! |
| Target Audience | System Administrators, Catalogers, users with server access |
| Prerequisites | SSH client connection to your Voyager database server, basic UNIX skills |
