

URL Scheme

Duration: 14 min.

Description	This session covers the campusM URL Scheme which enables intra-app linking, where a link can be embedded into one unit of the app to link to another. The URL Scheme can also launch external apps or websites. Topics discussed includes an overview of the URL Scheme and examples, the standard base functions in use and using the URL Scheme encoding to launch external apps from within the campusM app.	Attachments Handout
Target Audience	New and existing customers with responsibility for managing/maintaining their campusM instance.	
Prerequisites	None
