

Map inexplicably showing {Microforms}

- **Product:** Alma
 - **Product Version:** Jan 2018 Release
-

Description

When doing an all-titles title search, the first result shows "Map {microforms}", but we can't find any aspect of the record that would make it a microform record.

Resolution

This improvement to Alma's functionality is already currently part of the Alma road map. Since the resource types modifications are an enhancement, it is being handled internally by our development team and product managers. As a result, a target timeline, and any other release related information, is not obtainable.

Information regarding this improvement will be available in the appropriate release notes.
