Summon Title Report

Example Dashboards

The Example dashboard includes a tab for every Subject Area except for Device Usage. Selecting a tab in the dashboard opens the associated report.

Example Dashboard Tabs

Example Reports

The following table lists the out-of-the-box reports based on subject area. For more details, see [Subject Areas](#).

List of Subject Areas

Subject Area	Description
Actions	<p>A monthly report of the actions taken in Summon by end-users.</p> <p>Using the prompt at the top of the report it is possible to display a report by the number of actions per month, number of sessions in which actions were invoked or number of times the action was invoked when the user was signed in.</p> <p>There are separate reports for each Action sub group: Search, Results List, Document, and General.</p>
Device Usage	<p>A monthly report of the number of times specific devices were used.</p>
Facets	<p>A monthly report of the number of times specific facets were used.</p> <p>Using the prompt at the top, it is possible to display the number of sessions in which specific facets were used.</p>
Popular Searches	<p>The tab displays two reports – a monthly report of the most popular searches and a report of the most popular searches for the entire year.</p>
Sessions	<p>A monthly report of the number of sessions divided by the location (country) of the end-user.</p> <p>Using the prompt at the top, it is possible to display a report for the average duration of sessions, total number of actions taken and number of times users signed-in within a session.</p>
Zero Results Searches	<p>A report of searches that found no results.</p>
