

Advanced search "Starts with" doesn't work for 035 field

- **Product:** Alma
 - **Product Version:** February Release
 - **Relevant for Installation Type:** Multi-Tenant Direct
-

Question

When I try to search for All titles with "Other system number" selecting Starts with (AT-OBV)99, I get zero results.

The scope is to create a set containing records where 035 field is like (AT-OBV)99000211983020.

Answer

The Alma Solr index does not support a 'starts with' functionality for a single word, but in a sentence.

We suggests two solutions:

1. Prepare a wider set and refine it with indication rule.
2. Use Alma Analytics to filter according to the Network Number (a concatenation of 035 multi fields).
