

Publishing and import jobs fail; server issue

- **Product:** Alma
 - **Product Version:** Feb 2018 Release
-

Description

We had multiple publishing jobs fail this morning. There are no details about the error. The pipe in Primo is reflecting this failed job in that there were no records to harvest. A rerun of the jobs has also failed.

Resolution

This was an infrastructure issue (on the NA02 server) which Ex Libris developers resolved.
