

## Portfolio doesn't display in Institutional zone; multiple IEE's

- **Product:** Alma
  - **Product Version:** Feb. 2108 Release
- 

### Description

Despite our activating a particular portfolio, the portfolio does not display in the Institutional zone when we click on "portfolio list" . It displays only if we click on "view". Is there an explanation as to why the portfolio doesn't display?

### Resolution

This MMS ID was not showing all the attached inventory. It was an issue with the record structure: there were two IEE's even though an MMS ID should never have more than one.

This was corrected by the Alma Support team.
