January Sneak Peak

- An option to handle multiple results found by a resource locate.
- Additional details available to submit when a student marks a link as broken.

All

December Sneak Peak

- **Idea Exchange** Facets will replace filters on the Edit Citations and Reading Lists Task List pages.

November Sneak Peak

- New user role to manage all reading lists in an academic department.
- Modify reading list name during course rollover.

New Release Notes Format

The Leganto release notes were enhanced to include an entire calendar year of releases. Use the JavaScript tools at the top of the page to search by release, category (Leganto or Alma), and free text search that includes Salesforce case numbers and resolved defects.

Instructors will be primarily interested in Leganto features, which now includes resolved defects.

Main Features

Facets on the Edit Citations and Reading Lists Task List Pages

December 2018 Alma

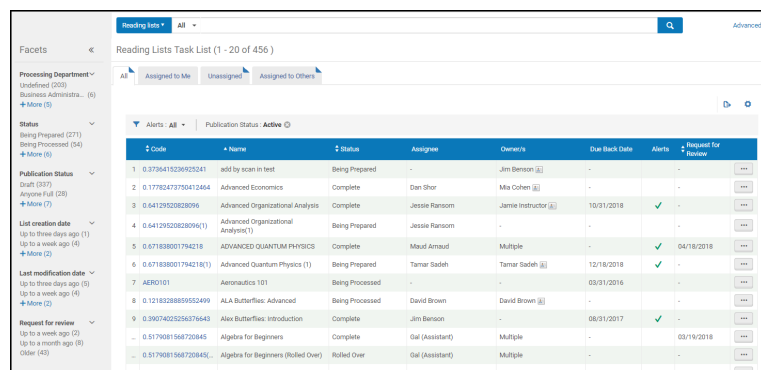

Facets were added in place of filters on the Edit Citations and Reading Lists Task List pages.

On the Edit Citations page, all filters were moved to facets. In addition, the facets **Processing Department**, **List Status**, and **License Type** were added as facets. In addition, a **Sort By** feature was added to the page, with the options **Last created**, **Last modified**, **Reading list name**, and **Citation title**.

Edit Citations

On the Reading Lists Task List page, the **Processing Department**, **Status**, **Publication Status**, and **List Modification Date** filters were changed to facets. **List Creation Date** and **Request for Review** (date) were added as facets. **Alerts** remains as a filter.

Reading Lists Task List

Published was added as an option for the publication status facet on both pages. **Published** matches all publication options other than **Archived** or **Deleted**. In addition, the processing department **Undefined** matches any reading list that does not have an associated course.

Summary of the new Reading Lists Task List Page Facets/Filters:

- The page includes the facets **Processing Department**, **Status**, **Publication Status**, **List creation date**, **List modification date**, and **Request for review**, as well as the filter **Alerts**.
 - The status **Processing** matches any reading list that is not marked as **Complete**, including **Inactive** or **Declined**.
 - For publication status, **Published** matches all reading lists that are not **Draft**, **Archived**, or **Deleted**, and **Active** (which is selected by default) matches all reading lists that are not **Archived** or **Deleted**.
 - The processing department **Undefined** matches any reading list that does not have an associated course.

Summary of the new Edit Citations Facets/Filters:

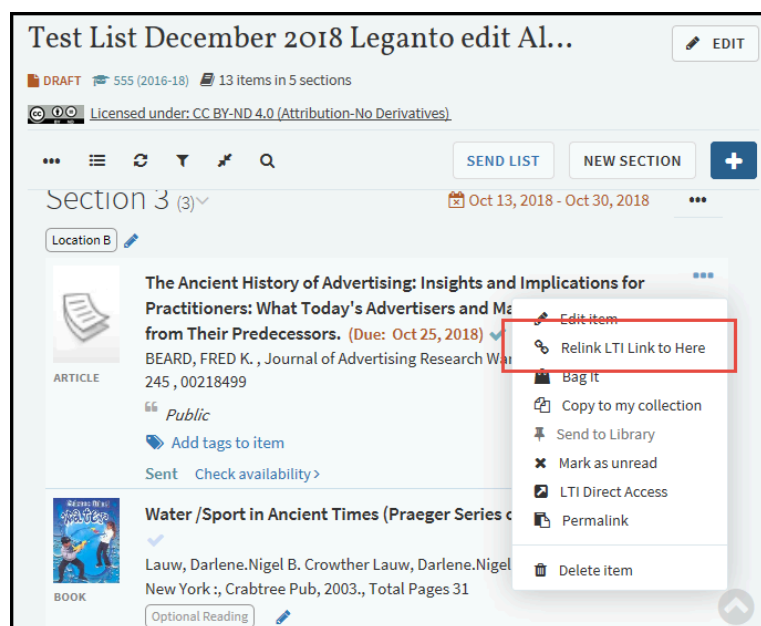

- The page includes the facets: **Course Status**, **Processing Department**, **List Status**, **List Assigned To**, **Publication Status**, **Section Tags**, **Citation Status**, **Resource Locate**, **Citation Tags**, **Material Type**, **Copyright Status**, **License Type**, **Alerts**.
 - For citation status, **Not Complete** matches any citation whose status is not **Complete**.

- For publication status, **Published** matches all reading lists that are not **Draft**, **Archived**, or **Deleted**.
- The processing department **Undefined** matches any reading list that does not have an associated course.

LTI Relink Options

November 2018 Leganto

When enabled by your library, an additional option, **Relink LTI Link to Here** in the section and citation menus, appears to instructors who arrive at Leganto using an LTI link to a reading list. When arriving at Leganto using an LTI link to a section or citation, the option **Unlink LTI Link** appears in these menus.

Relink LTI Link to Here

When you select **Relink LTI Link to Here**, the LTI link used to arrive at this reading list changes to arrive directly to the relevant section or citation. The option changes to **Unlink LTI Link**. When you select **Unlink LTI Link**, the LTI link changes to the reading list level.

For more information, see the video [Leganto: Link from LMS to a Specific Section or Citation in Your List](#) (1:59).

Enhancements to Digitization Request and (UK Only) DCS Integration

October 2018 Leganto

Ex Libris changed the digitization request form for all customers. In addition, for UK customers, Ex Libris enhanced the DCS integration process to enable requesting access to material not yet available from the DCS (until now, only material already available in the DCS was available to Leganto customers). While most of the enhancements are behind the scenes, the digitization request form was changed for all customers and, in particular, for UK customers.

Ask Library for Digital Copies Dialog Box

- All customers:
 - The partial digitization checkbox was removed.
 - Citation details were removed.
 - The fields for entering chapter / page information were combined on the page and the tabs were removed.
 - Either chapters or pages must be entered.
- UK customers only:
 - CLA information is included at the top of the form. This is the same information you see on the citation page.
 - Only a single range of pages is allowed.
 - The include image(s) checkbox and the date range fields were removed.
 - ISSN or ISBN must be entered.
 - The status of a digitization request appears as a non-editable tag for the citation (visible only by the instructor).

(UK Only) Enhancements to DCS Integration

October 2018 Alma

- Ex Libris enhanced the DCS integration process to enable requesting access to material not yet available from the DCS (until now, only material already available in the DCS was available to Leganto customers).
- On the DCS Search Results page, you now have three options:
 - As previously, if a digital copy already exists in the DCS, you can associate it with the citation.
 - If you have a digital copy that does not yet exist in the DCS, you can initiate a request for copyright approval directly from Alma. After initiating the request, log in to the DCS, locate the request, and add the digital copy.
 - If you do not have a digital copy but you have a valid MMS ID, you can initiate a digitization request directly from Alma and simultaneously initiate a DCS request, as above. When you have the digital copy, add it to the DCS, as above.

The field **DCS Status** appears for citations that have a DCS request in process or approved. In addition, an internal tag

is added to the item with the status returned from the DCS.

- The **require_chapter_pages** parameter was removed.
- Additional failure messages were added for digitization requests sent to the DCS.

When configuring a digitization workflow rule, select **Submit CLA/DCS Request** to automatically send a request to the DCS. The following out-of-the-box digitization workflow rules are suggested for UK customers.

- **DCS Check permission - Scanning Not Approved - Manual Review**
 - Request Type: Course related digitization
 - Copyright Agency Approval Permission: Scanning Declined
 - Output Parameter: Submit CLA/DCS Request
- **DCS Check Permission - Digital Not Approved - Manual Review**
 - Request Type: Course related digitization
 - Copyright Agency Approval Permission: Digital Declined
 - Output Parameter: Submit CLA/DCS Request
- **DCS - Resource is Available Electronically - Manual Review**
 - Request Type: Course related digitization
 - Available in Electronic: True
 - Output Parameter: Submit CLA/DCS Request
- **DCS - Automatic Approval (all the above rules are false)**
 - Request Type: Course related digitization
 - Copyright Agency Approval Permission: Digital Approved, Scanning Approved
 - Available in Electronic: False
 - Approval: True + Automatically Approved
 - Output Parameter: Submit CLA/DCS Request

Instructor Course Rollover (Leganto)

August 2018 Leganto This feature must be enabled by your library.

When enabled, course rollover enables you to use existing reading lists for the next semester or academic year. A course rollover is different from assigning an existing reading list to a new course or duplicating an existing list and assigning the new list to a new course: in addition to copying a citation's metadata and uploaded files, a course rollover ensures the transfer or reset of copyright records and data associated with the citations (such as tags, statuses, notes, and discussion threads), as defined by the library, from an existing reading list to the new one.

Rolling over a reading list does not change the **old** reading list.

A new reading list status, **Rolled Over** (code **RolledOver**), was added and can be used for rolled over reading lists (see the table, below).

For general information about Leganto course rollover and important information about handling links to the old and new lists, see [Links to Leganto Reading Lists](#) in Leganto Course Rollover.

To roll over a reading list (when enabled):

1. Select **Roll Over list** in a reading list ... menu. The Roll Over dialog box appears. The dialog box appears slightly differently if you are an instructor or a librarian.

Roll Over Dialog Box, Before Selecting a Course - Librarian

2. If you are an instructor, select one of your courses from the drop-down list. If you are a librarian, enter/select a course.

The Roll Over dialog box refreshes with the available data operations that you can configure. Your library can enable or disable which of these options appear and the default values for each option. The values of any options that don't appear are configured by your library and cannot be changed.

Roll Over Dialog Box, After Selecting a Course - Librarian

3. Select the desired method of handling each data operation, as follows.

Rollover Operations

Operation	Values	Notes
Do you want existing permalinks to point to the new list once the	<ul style="list-style-type: none"> ◦ Yes ◦ No 	When set to Yes , all existing permalinks point to the new (target) reading list after the rollover. There is no way for instructors and students to use these same permalinks to access the old (source) reading list. To ensure consistency, manually remove all

Operation	Values	Notes
list is published?		<p>permalinks for existing (and past) courses.</p> <p>When set to No, all existing permalinks continue to point to the old (source) reading list. You must create new permalinks to point to the new reading list.</p>
Due dates	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , the due dates of all citations are cleared.
Citation statuses	<ul style="list-style-type: none"> ◦ Recalculate ◦ Copy 	When set to Recalculate , Leganto recalculates the statuses as if the citations are newly created, as configured by the library.
Library-Internal tags	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , tags of these type in all citations are removed.
Reading list status	<ul style="list-style-type: none"> ◦ Copy ◦ Reset ◦ Rolled Over 	<p>When set to Reset, the new reading list status is Being Prepared.</p> <p>When set to Rolled Over, the new reading list status is Rolled Over.</p>
Reading list collaborators	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , all owners and collaborators, except for the instructor performing the rollover, are removed from the new list. The instructor remains as an owner of the new reading list.
Public tags	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , tags of these type in all citations are removed.
Public note	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	
List and section dates	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , all of these dates are cleared. (Copy is not recommended when performing a rollover.)
Student discussions	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Copy , student names in the discussion are anonymized.
Copyright approvals	<ul style="list-style-type: none"> ◦ Recalculate ◦ Copy ◦ Reset 	<p>When set to Recalculate, Leganto recalculates the copyright statuses as if the citations as newly created, as configured by the library.</p> <p>When set to Reset, Leganto resets the copyright statuses of all citations to their initial values as configured by the library.</p> <p>For information about the difference between these two options, consult with your library.</p> <p>When set to Copy, the copyright statuses are copied, as is, to the new list.</p>
Instructor-Library tags	<ul style="list-style-type: none"> ◦ Copy 	When set to Reset , tags of these type in all citations are removed.

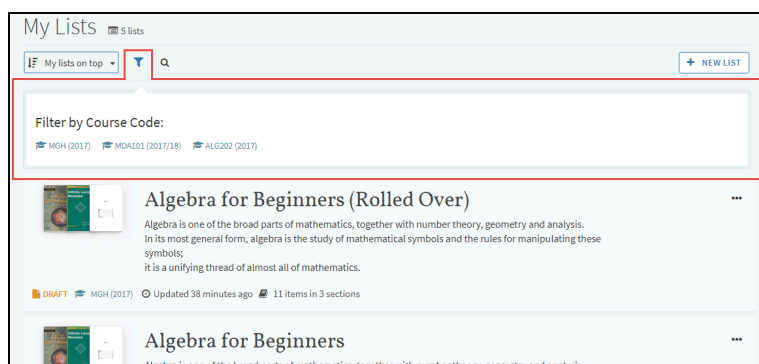

Operation	Values	Notes
	<ul style="list-style-type: none"> Reset 	

- When you are done, select **Roll Over** and select **OK** in the confirmation dialog box. The list is rolled over to the selected course; the name of list is appended with (Rolled Over), for example Algebra Syllabus (Rolled Over).

Reading List Sorting Enhancements

August 2018 Leganto SF: 00463479 00343562 00404230

- Course Code** was added as an option when sorting on the My Lists page. When selected, reading lists appear in descending order by course code. For reading lists associated to multiple courses, the first course code that was associated to the list is used for the sort order. Reading lists without a course code appear last, sorted by last updated (descending). The default sorting order is set by your library.
- You can now filter lists by course code on the My Lists page. When accessing Leganto from the CMS, the list is pre-filtered by the relevant course. In addition, only the reading lists of the relevant course appear to students.

My Lists Page

Total Pages

August 2018 Leganto SF: 00520052

When enabled by your library, the sum total of all pages of all citations appears at the top of a reading list and each section. The total includes the total pages of each citation that has pages defined. The total is determined from the **Start Page** and **End Page** fields; if either of these is not defined, the total is determined from the **Pages** field. Citations without pages, or whose pages cannot be parsed by Leganto, are not included in the total.

Default Statuses for Citations Enhancements

July 2018 Alma

Idea Exchange

- The Course Management Workflow mapping table was replaced with the Course Reserves Automatic Statuses mapping table. Most of the parameters were renamed and now enable you to enter the exact citation status (instead of selecting **true**, for **Complete**, or **false**).
- The two uploaded parameters (one that presented a checkbox and one that determined whether the checkbox was selected by default) was replaced with a single parameter that functions like the other parameters in the table.
- New parameters were added to set the default status of non-repository citations that are located, citations detached from the repository, citations whose list's status is set to **Complete**, or citations whose copyright status is marked as **Approved**.

See [Configuring Default Statuses for Citations/Reading Lists](#).

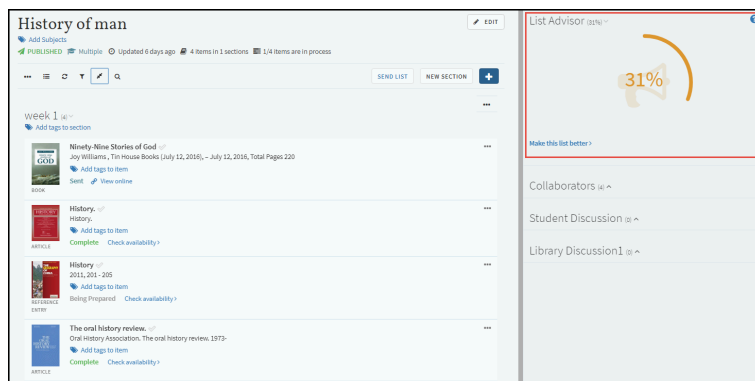

Reading List Advisor and Reading List Tips

June 2018 Leganto

Reading List Advisor

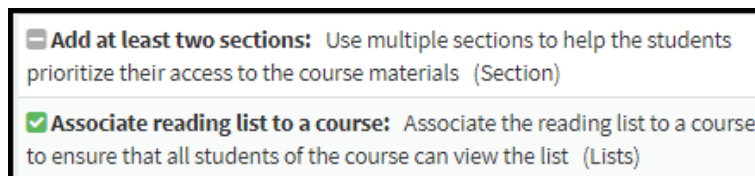

When enabled by your library, Leganto displays the *Reading List Advisor*, a widget that appears in the right pane when viewing a reading list and that displays a suggested "level of completion" of the list.

Reading lists with complete information and easily accessible materials are easier for the library to fulfill and more useful for your students. The Reading List Advisor shows you the progress you have made in creating fulfillable and useful reading lists.

Reading List Advisor

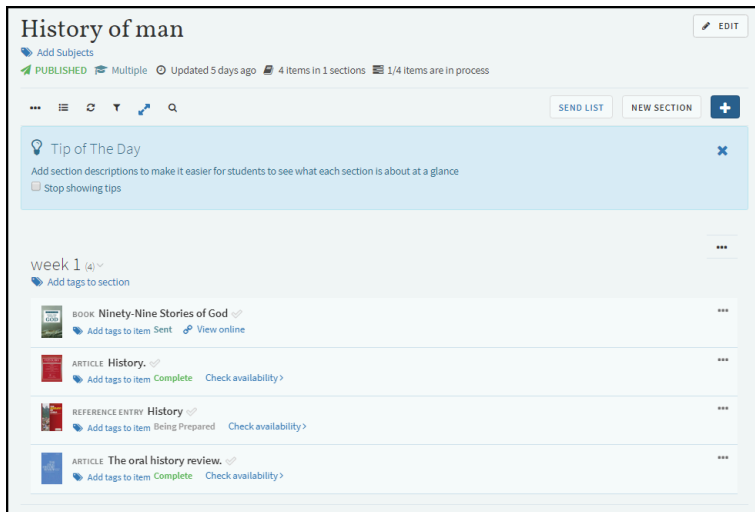

To see specific suggestions for making the reading list better, select **Make this list better**. A list of suggestions appears below the advisor. Suggestions that are already completed appear with a green checkmark; other suggestions appear with a grey dash.

Example Reading List Advisor Suggestions

Reading List Tips

When the Reading List Advisor is enabled by your library, you also see tips containing a random Reading List Advisor suggestion at the top of the reading list.

Reading List Tips

To close the tip, select **X** in the tip.

To prevent Leganto from displaying tips in the future, select **Don't Show Me Tips** in the tip.

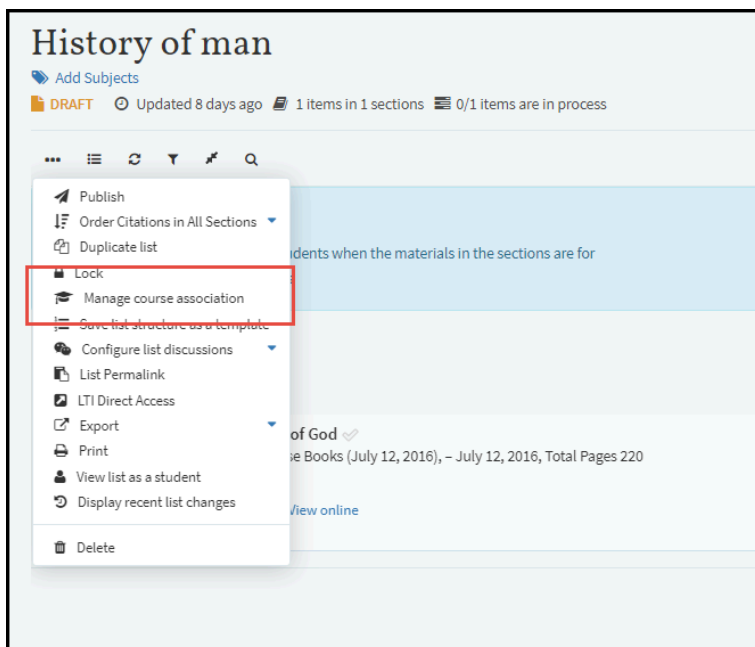

To restore tips to Leganto, select **See Tips** in **User Menu > User Settings**.

Reading Lists Associated with Multiple Courses

June 2018 Leganto SF: 00230641 00360137

When enabled by your library, reading lists can now be associated with multiple courses.

You now manage all course associations for a reading list using the **Manage course association** option in the reading list main menu.

Reading List Page

Select this option to open the Manage course association dialog box.

Manage course association

Associated to:

1. HI-135-3 (2017) X 2. HIST (2017/18) X

Look up course: HI-132-1 Games of History

Course dates:

06-May-2017 To- 01-December-2017

No. of participants: 120

+ Associate Course

CLOSE

Manage Course Association Dialog Box

Search for courses in **Look up course** field. After selecting a course, you can edit the course dates and number of participants. Select **Associate Course** to associate the course with the reading list. To remove an association, select **X** to the right of the list code. When you are done, select **Close**.

When multiple courses are associated with a reading list, **Multiple** appears in the reading list header, and the complete list of courses appears in a tooltip. However, if you arrive in Leganto from a link in a CMS to a specific course, reading list, or citation, the relevant course code appears instead of **Multiple**.

Enhanced Features for Adding and Editing

May 2018 Leganto

Adding citations to your reading list or My Collection, as well as searching for and editing citations, has changed in this release. All actions previously performed in a pop-up pane are now performed in the right sidebar.

Select **+** at the top of a section to open tools in the right sidebar for managing your section. This button replaces the **My Collection** button that was previously in that location, as well as the **+** button that was previously available in each section. **+** is always visible and available to add citations to any section on the page. Select **X** at the top left of the sidebar to close these tools.

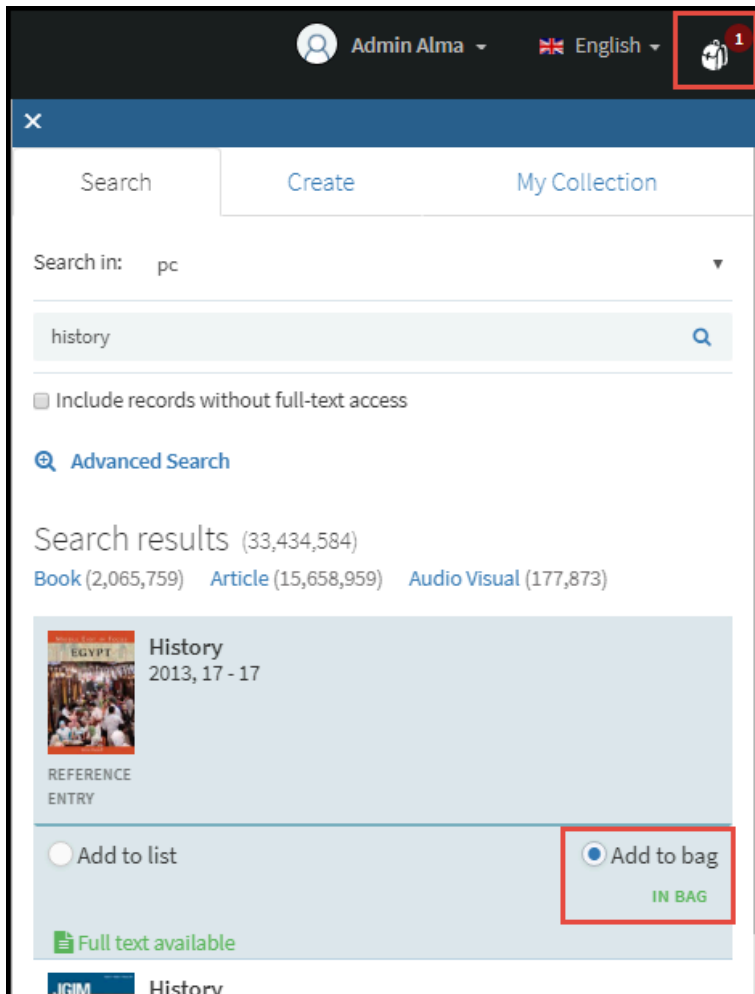

Right Sidebar for Managing Sections

The right side panel contains several tabs. Each tab provides a features for locating and selecting citations to add to your reading list. The sidebar remains open during the entire process, until you close it.

In the **Search** tab, select **Advanced Search** to open the advanced search in the sidebar. Select the **Create** tab to create a new citation, also directly in the sidebar. Select the **My Collection** tab to drag items to your section. If you have configured external citation management systems, such as **Zotero** or **Refworks**, you can do the same from the **More** tab (not shown).

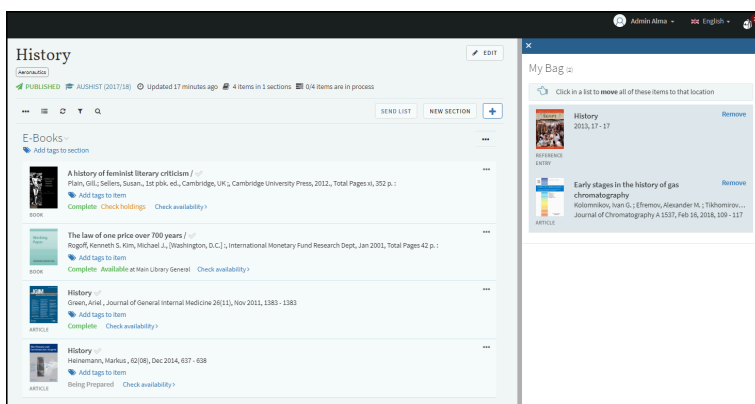

You can add citations to your sections in one of three ways:

- When **Searching** for a citation or viewing citations in the **My Collection** or **More** tabs, you can **drag and drop** citations one at a time to any section in the list. Scroll the reading list to the place you want to add the citation before dragging and dropping.
- Alternately, for each citation, select **Add to list**, select the section in the drop-down list and select **Add**. The default section in the drop-down list is the one currently visible in your reading list pane (if more than one is visible, it is the section whose title is closest to the middle of the page).
- You can add multiple items as a group to one location in your reading list using **My Bag**, a temporary “book bag” (like a clipboard). Select **Add to bag** (instead of the default **Add to list**) and then select **Bag It**. The item is added to My Bag, and an icon representing My Bag appears at the top right of Leganto.

Item Added to My Bag

My Bag's contents remain only while you continue to work in the list; if you navigate to another list or another area of Leganto, My Bag is emptied. Select the icon to view the items in My Bag.

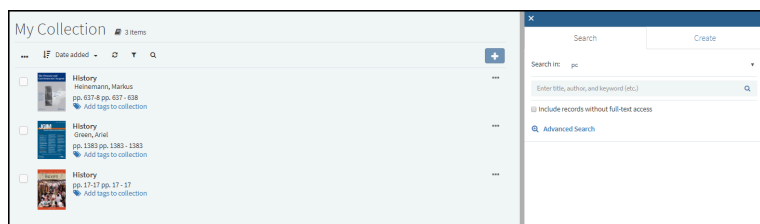

My Bag

While My Bag is open, you can click on or beneath any citation to move all items in My Bag to beneath that citation (as described in last month's release notes).

Editing a citation also now takes place in the right pane.

The **Search** and **Create** tabs are similarly available to manage My Collection.

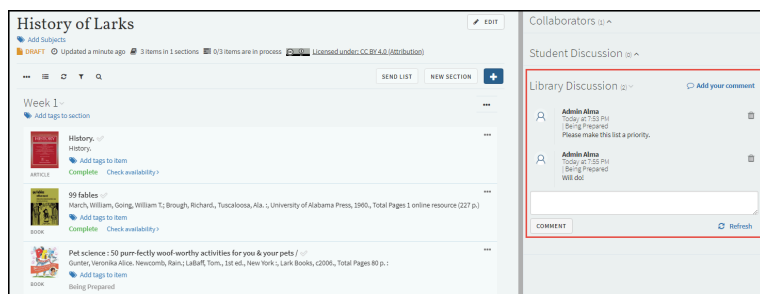

Right Sidebar for Managing My Collection

Library Discussion Enhancements

May 2018 Leganto SF: 00480283

You can now use the Library Discussion pane in the right menu of a reading list to communicate with the library about a reading list.

Library Discussion Pane

In addition, the **Library Discussion** pane for citations was moved to the right menu. The title for the discussion pane with students is now called **Student Discussion**. The title for the discussion pane with the library is now called **Library Discussion**.

Book Chapter Citation Enhancement

May 2018 Leganto SF: 00492146 00499014 00500069

Following December's changes for book chapter citations (see [Book Chapter Fields](#)), several additional changes were made to support book chapter citations.

- **Book Author** was added as a field for book chapter citations. Only **Book Author** or **Chapter Author** is expected for a book chapter citation. Both fields appear in the reading list page for the citation and on the citation details page.

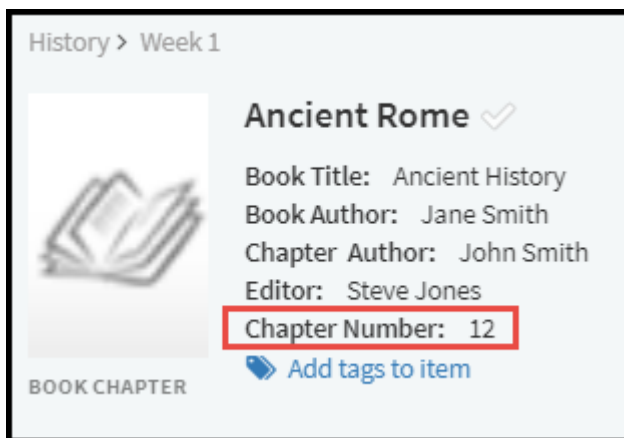

Add Citation Pane

- When **Editor** is defined, it also appears on the reading list page, as **edited by <editor>**. **Editor** also appears on the citation details page.

Reading List Page

- **Chapter Number** now appears on the citation details page.

Citation Details Page

- `<editor>` was added to the citations API.
- When exporting a reading list in Word (Expanded Reading List Style) or PDF, **Chapter Title**, **Chapter Author**, and **Editor** now appear, and **Chapter** was changed to **Chapter Number**.

Enhanced Reading List Reordering Features

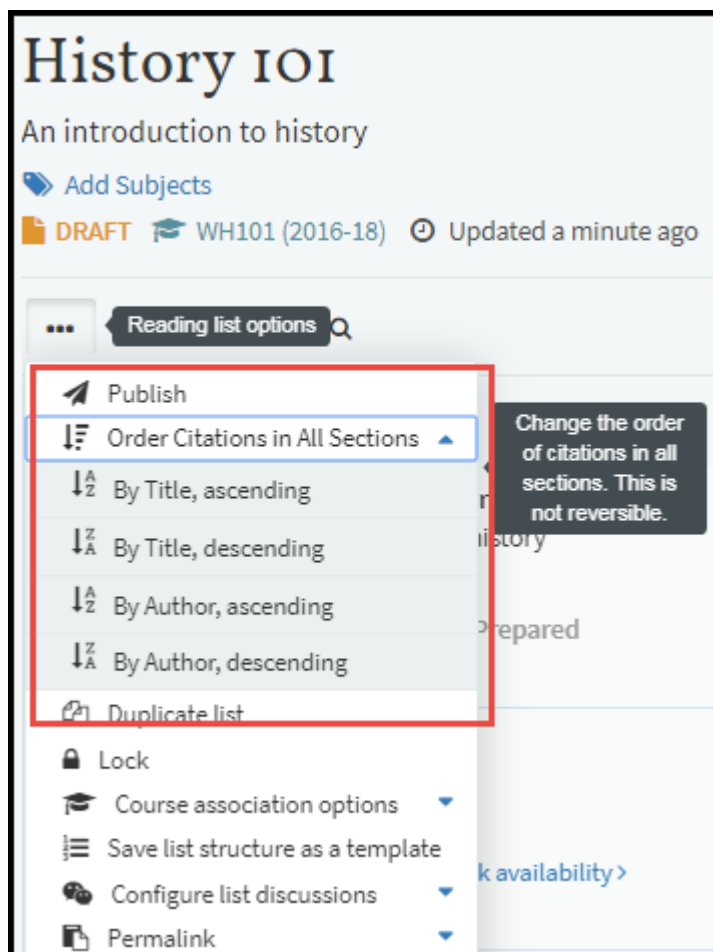

Mar 2018 Leganto SF: 00480951 00501427 00514784

Two new features were added to provide assistance in reordering reading lists:

- One-click reorder all citations in all sections.
- Select and insert multiple citations as a multi-step process, to avoid having to drag and drop.

One-Click Reorder

You can now reorder all sections in all reading lists by selecting a submenu option under **Order Citations in All Sections** in the reading list main menu. The options include ordering all sections by title or author, ascending or descending. This reordering is non-reversible, although, after performing the action, you can continue to move (drag and drop, or select and insert, as described below) citations to fine tune the ordering, as usual.

Order Citations in All Sections Submenu

Reading List After Reordering by Title, Ascending

Bag It: Select and Insert One or Multiple Citations

NERS Enhancement (ID #5524)

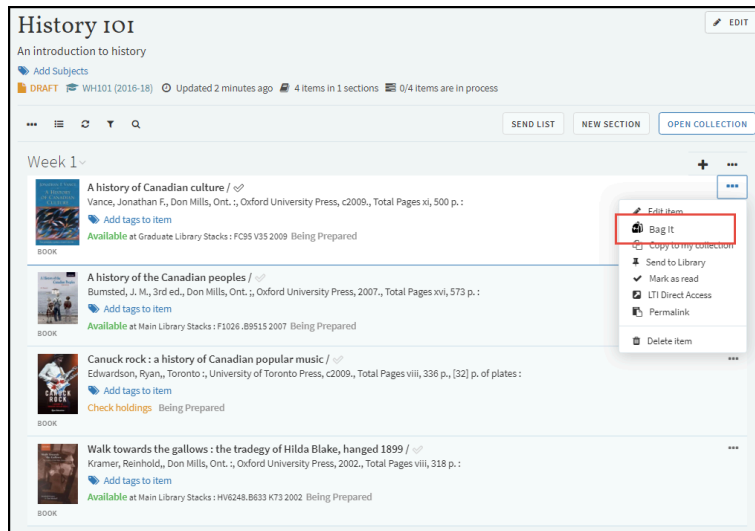

Note

The labels (as shown below) in the March sandbox are not yet correct. They will be correct by the March production release.

To avoid having to drag and drop citations, which can be difficult to do on smaller screens, you can perform a multi-step process to 1) select one or more sections or citations, and then 2) click to insert the selected citations below any other section or citation. The selected items are placed into a temporary clipboard, called *My Bag*. The actions in Leganto are presented as **Bag It** (to select the item, aka place it in My Bag), **Unbag It** (to unselect the item, aka remove it from My Bag), or move all items in My Bag from their existing locations to the selected location. My Bag is emptied after the items are moved.

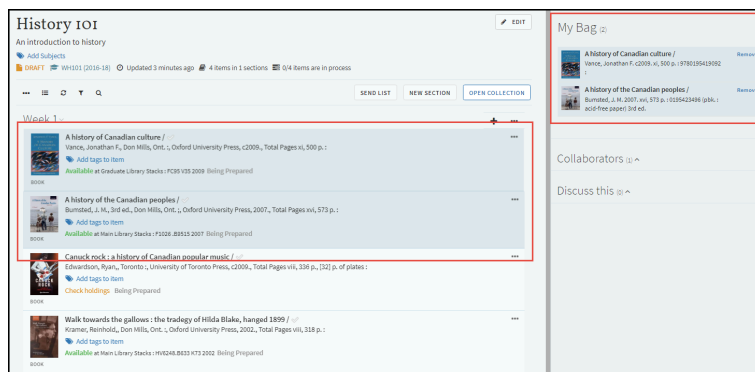

To select and insert citations in a reading list:

1. Select **Bag It** from the citation menu for each citation that you want to move.

Bag It Option

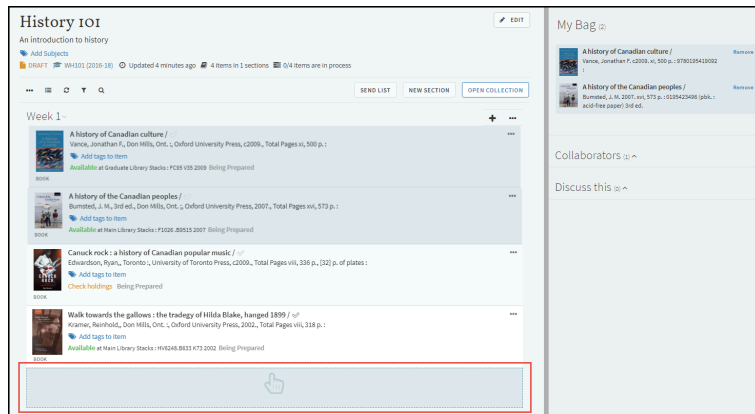

Selected citations are highlighted in the list and appear in the **Selected Items** pane.

Citations in My Bag

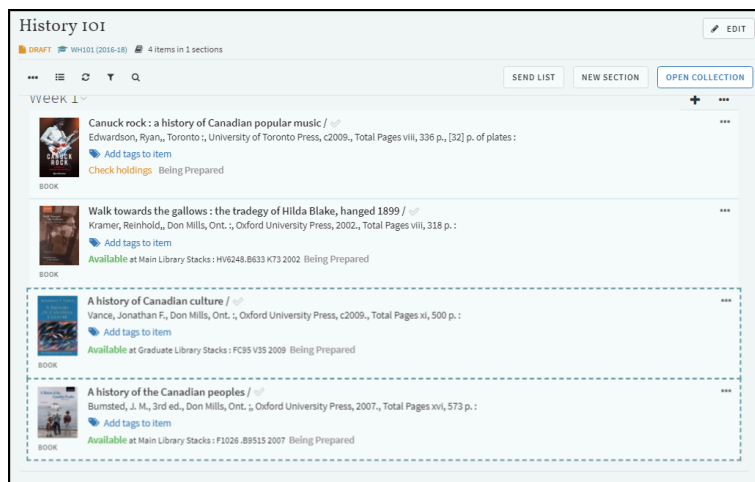

To un-select the item, you can a) select **Remove** in the My Bag pane, or b) select **Unbag It** from the citation menu of the citation. Note that the citations remain in their current locations, and My Bag becomes empty, if you navigate away from the current reading list.

2. Locate and hover your mouse over the citation after which you want to insert all selected citations. An insert bar with a pointer icon appears under the citation.

Insert Bar Under a Citation

3. Select the insert bar to move the selected citations to the new location. The selected citations are moved after the located citation. A dashed border briefly appears around the moved citations. All citations become un-selected.

Moved Citations

Reading List Notes

Feb 2018 Leganto

You can now add notes between citations in a reading list.

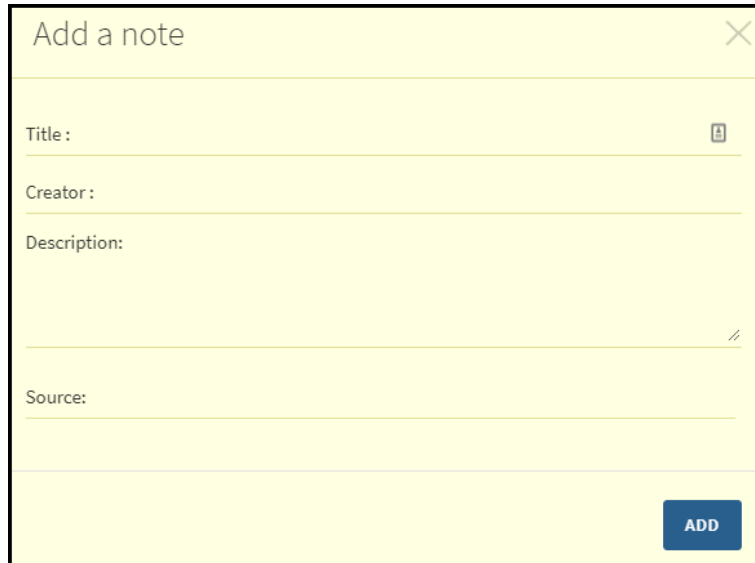

Reading List Note

You can drag and drop the note in a reading list like you can for a citation. The menu options for the note enable you to edit or delete the note. When exporting the reading list, these notes appear only in .Ign files and in Word (Expanded Reading List Format) and PDF formats.

To add a note:

1. Select **Add a Note** in the section menu. The Add a Note pane appears.

Add a Note Pane

2. Enter any required information and select **Add**. The note appears in the reading list.

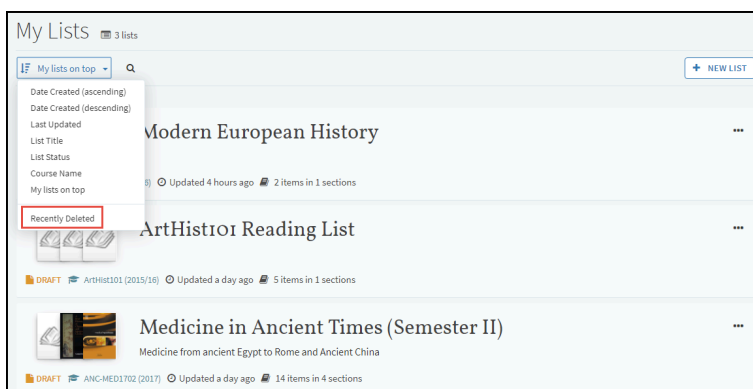

Viewing Deleted Lists in Leganto

Jan 2018 Leganto

You can now view and restore deleted lists in Leganto. To view deleted lists, select **Recently Deleted** in the My Lists sort menu.

Note

This feature is only available if your library retains information about (rather than immediately purge) deleted reading lists.

My Lists

The Recently Deleted page appears. Currently, all deleted reading lists appear on this page. In a future release, reading lists will be automatically purged a certain length of time after they are deleted, at which point they will be removed from this list.

Recently Deleted Page

To restore a list, select **Restore** in the reading list action menu.

To return to My Lists, select **Back to My Lists**,

Changes in Reading List Sets

Note

As of the December 2018 release, most reading list sets created prior to this release continue to function. However:

- If a set had a condition based on modification date, this condition was removed from the set.
- If you edit a set created prior to this release, some of the conditions may not appear on the page. When you then save the set, these conditions are lost. Therefore, if you edit a set created prior to this release, ensure that all conditions appear on the page. If they do not, you must recreate them.

We are sorry for the inconvenience. We recommend re-creating any sets created prior to this release.

Multiple Courses for a Single Reading List - Implementation Summary

October 2018 Fulfillment - Course Reserves

Here is a summary of currently supported and unsupported operations for multiple courses for a single reading list, in Alma and Leganto:

- Supported:
 - Enabled for Alma. Enabled by default for Leganto, but can be turned off.
 - Add, edit, remove reading list to multiple courses. Due back date updates to the last course ending date.
 - (Leganto only) All instructors from all courses are added as collaborators to the reading list.
 - Multiple courses appear on the Edit Citations and Edit Reading List pages. Sorting by course code uses the first added course code.
 - Multiple courses appear in **Course** column on Reading Lists Tasks List page. **All reading lists for this course** is not functional for these lists; you can view all reading lists for a course from the Courses page.
 - There is a **Course** tab on Edit Reading List page in which you manage all courses for a reading list.
 - All courses appear in places referring to a reading list's course name (except for the Approval Requests List page, which is scheduled for Nov).

- (Leganto only) CMS LTI links and permalinks display the correct course code on Reading List and Citation pages in Leganto. You can select the correct course when creating these links.
- Primo support.
- Reading list API support.
- (Leganto only) Copyright processing is supported.
- Unsupported:
 - Course rollover
 - Some notifications
 - Request processing
 - Digitization processing

Copyright Configuration Enhancements

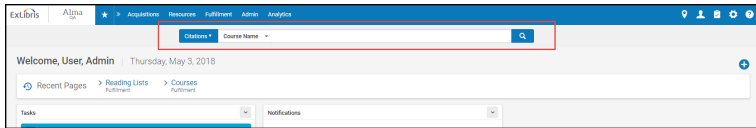

August 2018 Fulfillment / Fulfillment - Resource Sharing / Fulfillment - Course Reserves / Digital Resource Management

- All configuration options related to copyright management were moved from their old sections (Digital Fulfillment, Resource Sharing, and Courses) to the new section **Fulfillment > Copyright Management**. The new section includes the following configuration options:
 - Digitization and Copyright Rules (formerly known as Digitization Profile Rules in the Digital Fulfillment area)
 - Access Rights (formerly in the Digital Fulfillment area)
 - Copyright Declaration (formerly in the Digital Fulfillment area)
 - Resource Sharing Copyright Declaration (formerly known as Copyright in the Resource Sharing area)
 - Copyright Publishers (formerly in the Digital Fulfillment area)
 - Citation Default Copyright Status (formerly Default Copyright Status in the Courses area)
 - (Leganto only) Leganto Copyright Settings (formerly Copyright Settings in the Leganto area)
- **Request Type Parameter** was added as a filter on the Digitization Workflow Rules List. The possible values are the values for the **Request Type** parameter; see [Configuring Digitization and Copyright Rules](#).
- When a citation has a copyright request, the copyright status for the citation on the Edit Citations or Edit Reading List page now links to the request in the Approval Requests List.
- **Associated with Course (All or Associated)** was added as a filter on the Approval Requests List; see [Approving/Rejecting a Request for Digitization](#).

Searching for Citations

June 2018 Fulfillment - Course Reserves

You can search for citations in the persistent search box located at the top of most pages.

Citation Search in the Persistent Search Box

When searching for citations, you can enter the following additional criteria (for descriptions, see [Managing Citations](#)). Note that there is no advanced search for citations.

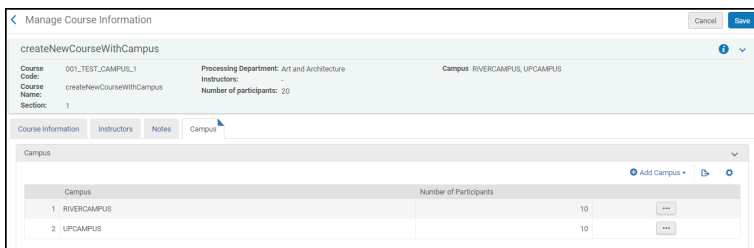

- Citation ID
- Course Code
- Course Name
- Creator - The primary ID or name of the user who created the citation
- ISBN / ISSN
- MMS ID
- Reading List Name
- Title - Citation name

Campus Associations for Courses

June 2018 Fulfillment - Course Reserves SF: 00494037

If you have defined campuses in your institution (see [Configuring Campuses](#)), you can associate these campuses with your courses. This enables you to define the number of participants on each campus for the course, which is helpful to librarians when they are fulfilling materials for reading lists associated with the course.

- When adding or editing a course (see [Managing Courses](#)), **Campus** appears as an additional tab. You can add predefined campuses as well as the number of participants for the campus.

Manage Course Information - Campus Tab

- When you associate campuses with your course, the number of participants for the course is the total of the number of participants defined for all campuses associated with the course. In this case, the **Number of Participants** field on the **Course Information** tab of the Manage Course Information page is disabled.

If no campuses are associated with your course, or if all campuses have no defined participants, you control the number of participants in the **Number of Participants** field on the **Course Information** tab of the Manage Course Information page (which is the current functionality).

- **Campus** was added as an available column (hidden by default), on the Courses, Course's Reading List, and Reading Lists Task List pages.
- **Campus** was added to the header information on the Manage Course Information, Course's Reading List, and Edit Reading List pages. Course was also added to **Course Information** on the Manage Resource Options pane when managing fulfillment options for a citation. When the number of characters is too short to display the full list of campuses, the full list is available in a tooltip.
- **Campus** and **Campus Participants** were added as columns in the Course Loader integration profile; see [Configuring Course Loading](#). For multiple campuses, enter campus codes separated by commas. Enter participants separated by commas in the same order (corresponding to the campus codes). If you enter a campus code that does not exist in Alma, the code is still accepted; a warning appears in the job report, but the campus is created and appears in Alma with the name "<code> not found". You can edit the campus name, as usual.
- The Course API now includes a campuses element:

```

<campuses>
  <campus>
    <campus code></campus code>
    <campus name></campus name>
    <campus participants></campus participants>
  </campus>
</campuses>

```

- **Campuses** was added to Analytics.

Select List Size

May 2018 Acquisitions / Fulfillment / Fulfillment - Course Reserves / Administration and Infrastructure

Idea Exchange

On certain pages, you can now select the list size displayed in Alma: 20, 50, or 100. Note that a larger list size might result in slowness when loading the page.

Results Per Page Tool

This feature appears when viewing:

- Users on the Find and Manage Users page
- Invoice lines on the **Invoice Details** tab when managing an invoice
- Physical items on the Active Hold Shelf Items page
- Citations on the Edit Citations page

Originating System ID for Citation Matching

March 2018 Fulfillment - Course Reserves SF: 00485964

You can enter an originating system ID for citations and then use this ID to help Alma locate library resources when locating citations.

- Many institutions work together with Ex Libris to migrate reading lists from a previous system to Alma. When Ex Libris migrates your data, you can supply this field for some or all citations. Talk to Ex Libris customer support about adding this field to the migration process.
- You can manually enter the field when adding a non-repository citation or editing a citation on the Edit Reading List Citation field. For more information, see [Adding Citations to a Reading List](#).

The screenshot shows the 'Additional Resource Information' form. The top section, 'Additional Resource Information', contains ten input fields labeled Source 1 through Source 10. The middle section, 'File Upload', has an 'Add File' button and a table with columns for File Name, Label, and Size, which is currently empty. The bottom section, 'Citation Parameters', includes dropdown menus for Material Type (set to 'Book'), Resource Locate Status (set to 'Resource Located'), and Creative Commons License. A text input field for 'Originating System Id' is highlighted with a red box. Other fields include a Public Note field and a Due Date field.

Edit Reading List Page, Bottom

- You can enable or disable using this field as matching criteria on the Match by Fields code table. See [Configuring Citation Matching Criteria](#).

Match by Fields Code Table

- <originating system id> was added to the reading list citation API.

Resource Sharing Requests for Citations

February 2018 Fulfillment - Course Reserves SF: 00412963

You can now initiate a resource sharing request for a citation. Note that, to use this feature, a) Ex Libris must enable this feature for your institution, and b) your Course Reserves Operator or Manager role must be in the scope of the resource sharing library. For more information, see [Managing Citations](#).

To create a resource sharing borrowing request for a citation: click the **Resource Sharing Request** citation action on the Edit Reading List page. The Resource Sharing Borrowing Request form appears. For more information see [Creating a Borrowing Request](#). The form is prefilled with the citation information, as well as the parameter values of parameters starting with **citation_rs_default_**; see [Other Settings](#).

- Four new citation alerts related to resource sharing were added.
- Four new customer parameters (starting with **citation_rs_default_**) were added to pre-fill certain information in the borrowing request, see [Other Settings](#).
- Reading list (**reading_list**) and citation (**citation**) codes were added to the Resource Sharing Receive Slip Letter; for the XSL, the codes are **reading_list_name** and **citation_id**; see [Configuring Alma Letters](#).

Citations of Type Note

February 2018 Fulfillment - Course Reserves

Citations with the new type **Note** (citations whose material type is set to **Note**; see [Configuring Citation Material Types](#)) can be added by instructors in Leganto. They are used to provide information to the students who are viewing the reading list, and do not need to be fulfilled by the library staff.

They can also be added in Alma: add a non-repository citation and select the material type **Note** (or edit a citation to have this material type). More likely, you will see these types of citations after they are added to a reading list by an instructor.

The only actions you can perform on these citations are **Edit** and **Remove**. See [Managing Citations](#).

Associating Reading Lists with Multiple Courses

June 2018 Alma SF: 00230641 00360137

Starting with this release, Ex Libris introduces the ability to associate a reading list with multiple courses. This is useful for courses taught in different locations, and/or by different instructors and/or in different times, but that all share the same reading list.

In this release, only part of the full features are implemented. Currently, you can associate a reading list with multiple courses and you can see the combined total number of participants. The following features are not yet implemented: updating the list due back date, selecting the relevant course for a permalink, publishing the correct link to the reading list in Primo, searching for lists by course code, displaying the correct course code in the citation pages, copyright processing, request processing, digitization processing, job reports, purchasing, course rollover, notifications, pay-per-use, all Analytics, and all APIs.

For more information, see [Managing Multiple Courses for Reading Lists](#). See also [Reading Lists Associated with Multiple Courses](#), above.

- To enable this feature, set **multicourse_lists** in the Leganto Customer Setting table (**Configuration Menu > Fulfillment > Leganto > Customer Settings**) to **true**.
- When this feature is enabled and **auto_set_instructors_as_owners** is **true**, all instructors from all courses are added as collaborators to the list. If an instructor is associated with at least one course that is still associated with the list, the instructor remains a collaborator, even when you remove other lists with which this instructor is associated. If you manually add an instructor as a collaborator, the instructor remains a collaborator even if you remove all courses with which the instructor is associated.
- When enabled, all associated courses appear in a reading list's **Course Code** and **Course Name** fields, in any other place in Alma that lists the course(s) associated to the list. If the list is too long to display, the full list appears in a tooltip. The total number of participants for a reading list is the total for all courses associated to the list.
- A **Courses** tab was added to the Edit Reading List page to enable you to add and remove courses from the list.
- Selecting **Associate this list with a course** on the Course's Reading List or Reading Lists Task List pages opens the **Courses** tab on the Edit Reading List page
- Selecting **Remove associated course** on these pages opens the **Courses** tab on the Edit Reading List page ONLY if there are multiple courses associated with the list (so that you can select which one to remove). If there is only one course associated with the list when you select this option, that course is simply disassociated with the reading list, as usual.
- On the Edit Citations page, searching for citations with an active course status will return all citations for which at least one of the courses associated to the citation is active.

Alma Features for Reading List Advisor and Reading List Tips

June 2018 Alma

To enable [Reading List Advisor and Reading List Tips](#) in Leganto, set **enable_list_advisor** to **true**. See [Managing the Reading List Advisor](#).

- When enabled, the advisor score and tips appear to users in Leganto. In addition, the score appears as a column (initially hidden) on the Reading Lists Task List page; see [Managing Reading Lists](#).
- You can configure what kinds of checks are performed and that contribute to the advisor's score on the Reading List Advisor Agenda Items mapping table (**Configuration Menu > Fulfillment > Leganto > Reading List Advisor Agenda Items**).

- A scheduled job, **UPDATE_READING_LIST_SCORE**, runs each night to update scores of reading lists that were modified on the previous day.
- The score appears in the **Reading List Information** pane on the Edit Reading List page; this is for informational purposes, only.
- `<score>` was added to the reading list API.
- Score will be added in a future release as a field in Analytics.

Additional Leganto Customization Options

May 2018 Alma

A new mapping table, Leganto Customization, was added (**Configuration Menu > Fulfillment > Leganto > Customization**). Use it to set the main page color and link color in Leganto. For more information, see [Configuring Leganto Branding](#).

[Gal] where is the documentation of the new attributes + please add the screen capture od Leganto in New colors

Integrating Leganto with the Copyright Clearance Center

Jan 2018 Alma

The *Copyright Clearance Center (CCC)* is a U.S. company that provides collective copyright licensing services for users of copyrighted materials. When CCC integration is enabled, librarians can provide *pay-per-use (PPU)* access from Leganto to CCC licensed materials; this is typically less expensive than purchasing unrestricted electronic access to the material.

Ex Libris supports both *funded* and *non-funded* licenses for each citation. For funded licenses, the first access by a student to a licensed material is considered a pay-per-use *transaction*. Ex Libris maintains a list of all transactions and bills the institution on a monthly basis, passing the fee collected to the CCC. For non-funded licenses, the student can select to pay for access to the citation, directly in Leganto. Ex Libris also tracks these transactions.

Features:

- CCC licenses are available to students in Leganto for uploaded materials. Note that CCC does not provide access to materials; you must already have the materials and be able to upload them (typically as PDF documents) to Alma/ Leganto as citations.
- Librarians can select from a list of matching CCC licenses based on a title or ID search.
- For licenses restricted to a limited number of transactions, Leganto removes the access link to the material after this number is reached.
- CCC licenses automatically expire a month after a course becomes inactive, or after six months from the day the license was obtained, whichever comes first.
- In Alma, librarians can view transactions by item or by course. In Leganto, instructors can view the price of each item, as well as the total cost of materials in a reading list and the total amount spent as a result of student access in real time. For funded licenses, students do not see the material cost (or pay for the materials).
- For non-funded licenses, students can add items to a shopping cart. At any time, students can pay for all licenses in the cart using their Paypal account, after which the materials are available to them.

- Ex Libris bills the institution each month for total access to all funded materials for all courses. The bill is sent as an invoice and enters into Alma invoice processing.
- When rolling over courses, licenses for materials are rolled over but set to inactive. You can run a job to activate all of these licenses.

To enable integration with CCC, contact Ex Libris support. For more information, see [Integrating Leganto with the Copyright Clearance Center \(CCC\)](#).

Change All Leganto Texts

Jan 2018 Alma

You can now change any text in any message or labels in Leganto; see [Configuring Headings and Text in Leganto](#).

Note that translations of all texts are already available for several languages; see [Configuring Default Language](#).

Additional Enhancements

- **December 2018 Fulfillment - Course Reserves / Analytics**

The following fields were added to Leganto Student Usage > Student Usage:

- Number of Files Downloaded
- Students that Downloaded Files

- **December 2018 Fulfillment - Course Reserves / Analytics**

The **Citation Library Internal Tags** field was added to the following locations:

- Student Usage > Citations
- Course Reserves > Reading List Citation

- **November 2018 Fulfillment - Course Reserves**

In the course loading integration profile, you can now enter the new reading list name when rolling over a course with a single reading list. If you leave the field empty, the new reading list name is the old reading list name followed by (Rolled Over). (The functionality up until this release was to roll the list over with the list name followed by (I).) If the course has multiple reading lists, the value is ignored and all lists are rolled over with (Rolled Over) added to their name. See [Configuring Course Loading](#).

- **November 2018 Fulfillment - Course Reserves SF: 00583379**

In the course loader integration profile, the field **On rollover copy copyright approvals** was changed to **On rollover copy copyright approvals or copyright status**. When **Copy** is selected, the field will copy either the copyright record (the result of the approval process) or a manual copyright status. When **None** is selected, any copyright record or manual status is cleared. See [Configuring Course Loading](#).

- **November 2018 Fulfillment - Course Reserves**

For reading lists associated with multiple courses:

- All courses appear in the **Course** column on the Approval Requests List page. See [Approving/Rejecting a Request for Digitization](#).
- The number of courses appears in the **More Info** tab on the Edit Citations / Edit Reading List pages. See [Managing Citations](#). Select the number to view the courses on the Courses page. See [Managing Courses](#).

- **October 2018 Fulfillment - Course Reserves**

In the course loading integration profile, you can now indicate whether, when rolling over courses, old permalinks continue to point to the old source/lists or to the new course/lists. See [Configuring Course Loading](#). In addition, when

rolling over a course to the same code, the new list's name is <old lists name> RolledOver.

- **October 2018 Fulfillment / Fulfillment - Course Reserves SF: 00519944**

Volume and **Issue** were added as (initially hidden) columns on the Approval Requests List page.

- **October 2018 Fulfillment - Course Reserves / APIs**

For reading lists associated with multiple courses:

- The reading list API now supports multiple courses.
- Copyright rules now work correctly for these lists.

- **October 2018 Fulfillment - Course Reserves**

An additional tag type, **Internal**, was added for citations and sections. Internal tags are created by Ex Libris and cannot be managed by customers. They are typically added to a section or citation as a result of a Leganto or Alma feature and used to indicate some kind of process status for that feature. They are visible to instructors in Leganto and to librarians in Leganto and Alma. Customers cannot add, edit, manage, or remove these tags.

- **October 2018 Fulfillment - Course Reserves SF: 00506530**

(URM-88187) **Year** was added as a column on the Courses page (initially hidden).

- **October 2018 Fulfillment - Course Reserves**

(URM-91724) **User** was added as a column in the **Recent Changes** tab on the Edit Reading List page.

- **August 2018 Fulfillment - Course Reserves**

Additional information - Second extract permissions - is now returned with the CLA permissions.

The screenshot shows a form for a digital usage type. The 'Usage type' is set to 'Digital' and the 'Identifier' is '1468229X'. The status is 'Permitted'. The header text states: 'Subject to defined extent limits, this title is covered by your CLA licence for the following uses:'. The response section lists several permitted uses: 'Designated Persons may: Make digital copies, Print paper copies, Email digital copies, Store digital copies on a Secure Network, Use digital copies in PowerPoint presentations, Send digital copies to overseas students, who may print a single copy, Other uses specific to the CLA Higher Education Licence - see terms and conditions for details'. The footer text states: 'This text is intended for use as guidance only and not as a substitute for the CLA Licence Terms themselves, which should be read in full. In the event of conflict between the two, the Licence shall prevail. For permissions not listed above, please contact the publisher direct.' A red box highlights the 'Second extract permissions' section, which is 'available' and includes the text: 'Second extract permissions allow customers to reuse an additional section of a published work. More information can be found [here](#)'.

CLA Second Extract Permissions

- **July 2018 Fulfillment - Course Reserves**

Some changes were made to the required format of the file uploaded using the course loading integration profile. **Start Date** and **End Date** are no longer mandatory. The campus fields were combined. The documentation (see [Configuring Course Loading](#)) clarifies how to use the **Operation** and **Submit By Date** fields, and a new sample Excel File was added.

- **July 2018 Fulfillment - Course Reserves**

CD and **DVD** were added as [citation material types](#).

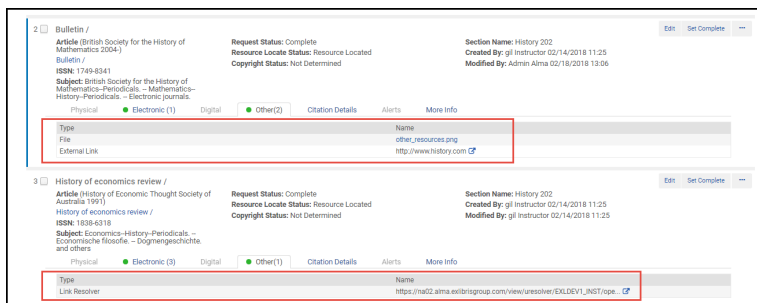

- **July 2018 Fulfillment - Course Reserves**

You can set the default start and end dates selected when adding a course. See the parameters **default_course_start_date** and **default_course_end_date** in [Configuring Other Settings](#). If one of the parameters is not set, the current date is selected by default.

- **June 2018 Fulfillment - Course Reserves / Analytics SF: 00501021**
The **Reading List Deleted** field was added to the Reading List dimension of the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage Events subject areas. It indicates whether the reading list was deleted.
- **June 2018 Fulfillment - Course Reserves / Analytics**
The **Course Submit List By** field was added to the Course dimension of the Course Reserves subject area. It contains the date by which all reading lists for the course should be submitted.
- **June 2018 Fulfillment - Course Reserves / Analytics SF: 00512248 00520203**
The **Reading List Description** field was added to the following locations:
 - Course Reserves > Reading List
 - Leganto Instructor Usage Events > Reading Lists
 - Leganto Student Usage > Reading Lists
- **June 2018 Fulfillment - Course Reserves / Analytics SF: 00491061**
The following fields were added to the Citation Metadata Details dimension of the Leganto Instructor Usage Events subject area:
 - Author
 - Book Call Number
 - Book Chapter Number
 - Book Edition
 - DOI
 - End Page
 - Issue
 - Journal Title
 - MMS ID
 - OCLC Number
 - Pages
 - Publication Date
 - Publication Place
 - Publisher
 - Volume
- **June 2018 Fulfillment - Course Reserves**
The options for **citation tags** and **item to student ratio** were added to the automatic purchasing request rules; see [Configuring Automatic Purchasing Requests from Citations](#).
- **June 2018 Fulfillment - Course Reserves**
The Citation Inventory Enrichment job was renamed the **Process and Enrich Citations** job. The link to this job was changed from Bulk Citation Inventory Enrichment to **Process and Enrich Citations**. The job can now validate URL citations by trying to access the URLs and checking for valid HTTP responses. When running the job, you can select whether to a) match to the repository (enriching with an MMS ID), b) using the OpenURL link resolver, and/or c) validating URLs.
- **June 2018 Fulfillment - Course Reserves SF: 00514642 00519944**

The column **Required Pages** was added as a column (initially hidden) on the Approval Requests List page (see [Approving/Rejecting a Request for Digitization](#)). This can help you discover whether there are overlapping pages when determining whether to approve/reject the page for processing.

- **June 2018 Fulfillment - Course Reserves SF: 00521028**
You can now edit reading list subjects; see [Configuring Reading List Subjects](#).
- **June 2018 Fulfillment - Course Reserves**
In the course loading integration profile, the **Additional Parameters** column (in which you could only add Submit By Date information) is now just the **Submit By Date** column. Instead of using the format `submit_lists_date=<date>`, the column format is simply `<date>`.
- **June 2018 Fulfillment - Course Reserves / APIs**
The Create Citation API now supports secondaryType for POST/PUT operations.
- **May 2018 Analytics / Fulfillment - Course Reserves**
The **Additional Person Name** field was added to Course Reserves > Citation Metadata Details. The existing field under the Reading List Citation dimension was renamed **Citation Additional Person Name (to be deprecated)**.
- **May 2018 Analytics / Fulfillment - Course Reserves SF: 00408643**
The **Leganto Send Lists For Review** field was added to the Reading List dimension of the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage subject areas. It indicates the date that the reading list was sent for review.
- **May 2018 Analytics / Fulfillment - Course Reserves**
The **Total Events** and **Total Events using LTI** (a learning tool interoperability system) fields were added to the Leganto Institution Student Usage subject area.
- **May 2018 Fulfillment - Course Reserves**
Academic Department was added as a filter on the Courses page; see [Managing Courses](#).
- **May 2018 Fulfillment - Course Reserves SF: 00505538 00395689**
You can now use the Reading List Bulk Update job to change a) the Creative Commons license and/or b) to whom the lists are assigned. See the [Reading List Bulk Update](#) job.
- **May 2018 Fulfillment - Course Reserves SF: 00483020**
On the Edit Reading List page, you can now click **Demand in Other Lists** to open the Manage Resource Options page with the **Course Information** tab pre-selected; see [Managing Citation Fulfillment Options](#).
- **May 2018 Fulfillment - Course Reserves**
Alerts for citations on the Edit Reading List page are now sorted by date, rather than alphabetically.
- **May 2018 Fulfillment - Course Reserves**
LibGuides was added as a secondary material type for citations; see [Configuring Citation Material Types](#).
- **May 2018 Fulfillment - Course Reserves**
The task **Reading List - Unassigned - Ready or processing** was added to the Tasks List.
- **May 2018 Fulfillment - Course Reserves**
You can now change the labels of the predefined reading list statuses; see [Configuring Reading List Statuses](#).
- **March 2018 Fulfillment - Course Reserves SF: 00476411**
On the Edit Citations and Edit Reading List pages, the row actions View, View It, and View Source were removed in place of a new tab **Other**, which provides these features as links of type **File**, **Link Resolver**, and **External Link**, respectively. (A row of type **File** provides a link to an updated file. A row of type **Link Resolver** provides a link to an OpenURL link. A row of type **External Link** provides a link to a source URL.) See [Managing Citations](#).

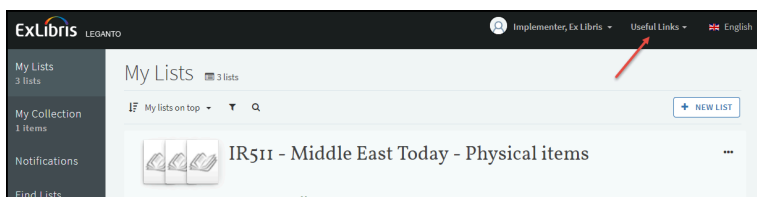

Edit Reading List Page

- March 2018 Fulfillment - Course Reserves SF: 00500069**
 The **Processing Department** filter on the Reading Lists Task List page defaults to your department when accessing the page from the persistent menu. When accessing the page from a task, the filter defaults to **All**.
- March 2018 Fulfillment - Course Reserves / Analytics**
 The **Event Creator** field was added to the **Instructor Usage Events** dimension of the Leganto Instructor Usage Events subject area.
- March 2018 Fulfillment - Course Reserves / Analytics SF: 00496183**
 In the **Citation Metadata Details** dimension of the Course Reserves and Leganto Student Usage subject areas, the **Book Chapter Author**, **Book Chapter Editor**, and **Book Chapter Title** fields were added and the Book Chapter field was renamed **Book Chapter Number**.
- March 2018 APIs / Fulfillment - Course Reserves SF: 00500069**
 The citation API now returns **chapter_author** and **chapter_title** for book chapters.
- February 2018 Fulfillment - Course Reserves**
 The course's **Processing Department** filter and column (initially hidden) were added to the Reading Lists Tasks List page; see [Managing Reading Lists](#). When accessing this page from a task related to unassigned reading lists, the processing department to which you are associated is pre-selected.
- February 2018 Fulfillment - Course Reserves**
 The **Citation/Locate Status** filter on the Edit Citations and Edit Reading List pages was split into **Citation Status** and **Resource Locate**.
- February 2018 Fulfillment - Course Reserves**
 For articles, volume and issue fields were added to the Copyright Attributes tab for a citation.
- February 2018 Fulfillment - Course Reserves**
 The options to modify the reading list visibility start and end dates, remove owners, or remove course associations was added to the [Reading List Bulk Update job](#).
- February 2018 Fulfillment - Course Reserves SF: 00475709**
 A course code can now be up to 255 characters (instead of 50 characters).
- January 2018 Fulfillment - Course Reserves SF: 00505538 00506699 00507397**
 You can now associate a reading list to a Creative Commons license. See [Editing a Reading List](#).
- January 2018 Fulfillment - Course Reserves** You can add or manage subject tags for reading lists (this feature was previously available only in Leganto). A new tab **Subjects** appears on the Edit Reading List page. For more information, see [Editing a Reading List](#).

Note

Leganto customers can disable this feature, because some institutions do not want subjects to appear in the Leganto UI. See [Disabling Reading List Subjects](#).

- **January 2018 Fulfillment - Course Reserves**
You can now run the manual job Reading List Bulk Change to change a set of reading lists. See the [Reading List Bulk Change](#) job. The privilege **TASK_CHAIN_UPDATE_READING_LIST** was added to the Course Manager Reserves role for this feature.
- **January 2018 Fulfillment - Course Reserves**
The Bulk Citation Inventory Enrichment job (see [Matching Reading List Citations to Inventory in Bulk](#)) now also runs the OpenURL link resolver to check for electronic resources for the citation, in order to update a citation's **Locate Status**. For more information, see [Managing a Citation's Attachment to an Inventory Item](#).
- **January 2018 Fulfillment - Course Reserves**
When printing a slip report for a reading list, **Barcode** was added as the last column in the report.
- **January 2018 Fulfillment - Course Reserves**
The columns **Creation Date** and **Modification Date** are now sortable on the Reading Lists Task List page.
- **January 2018 Fulfillment - Course Reserves**
The format of the Submit List By column in the course loader integration profile was changed to be more flexible, to allow additional parameters in the future. See the new format in the [Configuring Course Loading](#).
- **December 2018 Alma**
The reading list description (<description>) was added to the reading list API (for Leganto only).
- **December 2018 Alma SF: 00579362**
By default, Leganto updates a reading list and its citations' statuses from Being Prepared to Ready for Processing when a list is published. To have Leganto NOT do this, set the parameter **send_list_on_publish** to **false**. See [Configuring Reading List Publication Options](#).
- **December 2018 Alma SF: 00527534 00566818**
When you have searchable IDs, you can configure whether Leganto displays the Alma course code or the searchable ID using the parameter **display_cms_id**. See [Configuring How Courses Appear in Leganto](#).
- **December 2018 Alma**
The statuses of DCS requests are now updated daily based on a scheduled job DCS Synchronize. For more information, see [Attaching a Citation to the CLA Digital Content Store](#).
- **December 2018 Alma SF: 00465495 00576175**
You can configure whether a logged-in user remains logged in when accessing the Find Lists page using a permalink or accesses Leganto as a guest. For this feature to work, a) your IDP (SAML) must support passive mode, and b) you must set the parameter **find_list_sso** to **true**. See [Enabling SSO When Accessing Find Lists Permalink](#).
- **December 2018 Leganto**
Useful Links was moved to the top of the page.

Useful Links in Leganto

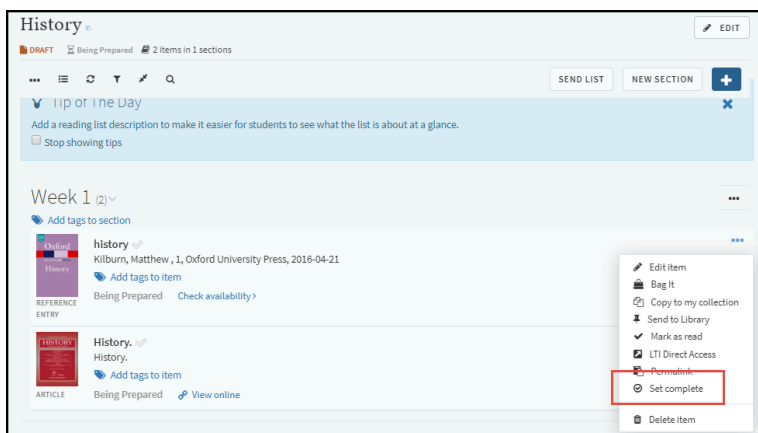

- **December 2018 Alma**

NERS Enhancement (ID #5912)

Librarians (only) can now mark a citation as complete directly within Leganto. This action is only available for citations

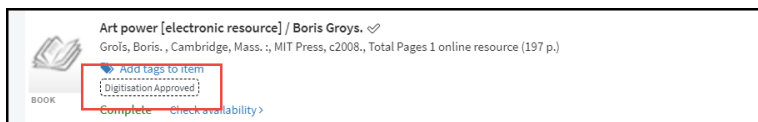

that are not already marked as complete.

Set Complete in Leganto

- **December 2018 Leganto**

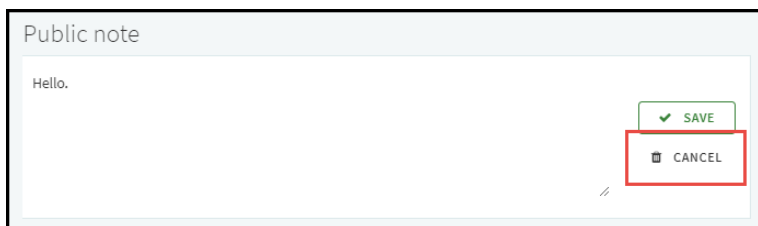

The appearance of internal tags was made more distinctive. For more about internal tags, see the [October release notes](#).

Citation with Internal Tag

- **December 2018 Leganto**

The button **Discard** was changed to **Cancel** in all relevant locations ("cancel" more clearly means "close the editing box and do not make any changes", whereas "discard" could mean "remove all contents in the editing box", which is not what happens).

Public Note Editing Box

- **November 2018 Leganto SF: 00583379**

When rolling over a list, the field **On rollover copy copyright approvals** was changed to **On rollover copy copyright approvals or copyright status**. When **Copy** is selected, the field will copy either the copyright record (the result of the library's approval process) or a manual copyright status. When **None** is selected, any copyright record or manual status is cleared.

- **November 2018 Leganto**

For Leganto, the uResolver now uses author to help resolve article location when start page is missing.

- **November 2018 Alma**

To enable relinking LTI links, set the parameter **LTI_relink_option** to **true**.

- **November 2018 Alma**

A new user role, **Leganto Course Operator**, enables a user to view and modify all reading lists in Leganto. Like a

librarian, a Leganto course operator can search for all lists on the Find Lists page in Leganto, including ones that are in draft status. In contrast, an instructor can only search published lists and can only modify reading lists of the course to which he or she is associated or is an owner.

Find Lists

- **November 2018 Leganto**

You can change the reading list name when rolling over the list. The default list name is the old name followed by (Rolled Over).

Roll Over Dialog Box

- **October 2018 Alma**

To configure whether or not inventory of related records appear for a citation, set the parameter **related_records**. See [Configuring Whether Related Record Inventory Appears in Leganto](#).

- **October 2018 Leganto SF: 00570017**

Additional person name(s) now appears between the book author and the place of publication for book chapter citations when viewing a reading list.

- **October 2018 Leganto**

DOI now appears at the top of the citation page for articles.

- **October 2018 Leganto / Alma**

List was rolled over was added as a notification for when an instructor rolls over a reading list.

- **October 2018 Leganto**

Some visual changes were made to improve accessibility:

- When an accessibility display option is selected, an indication of this appears at the top of the page.
- The Search button was moved out of the search field on the Find Lists page.
- Titles were added to the right sidebar tabs.

- **October 2018 Alma SF: 00509874**

You can now map which CMS roles indicate that a user coming from the CMS is added as an instructor to a course . For each CMS role/LTI profile, you can also indicate the number of days after which to remove the user as an instructor. See [Mapping CMS Roles to Instructors in Leganto](#)

- **October 2018 Alma**

Continuing our enhancements for multiple courses associated to a single reading list:

- The action **All reading lists for this course** on the Reading Lists Tasks List page no longer works for a reading list associated with multiple courses. Select a course code from the **Course** column to view the reading lists of that course.
- Pages now display the correct course code for users arriving using a permalink.

- **October 2018 Alma**

A librarian can now always select the Alma search scope, regardless of the Primo search scope configuration settings.

- **October 2018 Alma SF: 00492695 00514848**

You can now enable or disable, or change the display text of the bibliographic styles that are used when exporting to Microsoft Word. For more information, see [Managing Bibliographic Styles](#).

The screenshot shows a 'Mapping Table' interface for configuring bibliographic styles for export to Word in Leganto. It includes a table with columns for Enabled, Style Code, Style Name, Updated By, and Last Updated. The table lists six styles, all of which are currently enabled.

Enabled	Style Code	Style Name	Updated By	Last Updated
<input checked="" type="checkbox"/>	american-medical-association	American Medical Association	admin	08/08/2018
<input checked="" type="checkbox"/>	american-political-science-association	American Political Science Association	admin	08/08/2018
<input checked="" type="checkbox"/>	american-sociological-association	American Sociological Association	admin	08/08/2018
<input checked="" type="checkbox"/>	chicago-author-date	Chicago (Manual of Style 16th edition)	admin	08/08/2018
<input checked="" type="checkbox"/>	harvard-imperial-college-london	Harvard	admin	08/08/2018
<input checked="" type="checkbox"/>	ieee	IEEE	admin	08/08/2018

Bibliographic Styles Page

- **September 2018 Alma**

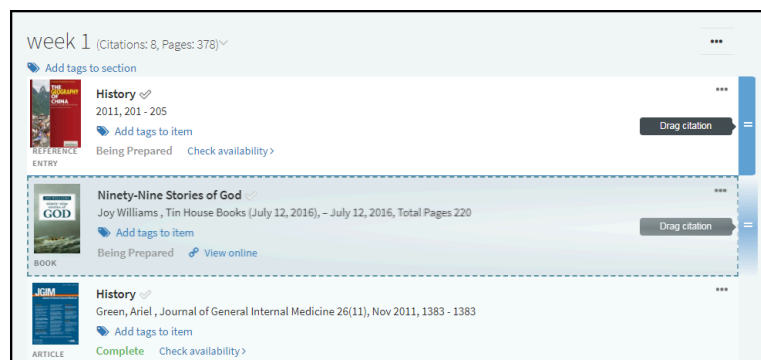

To find reading lists that are not associated with a course, use the persistent search to search for **Reading Lists > Course** with the term `EXLIBRIS_DEFAULT_COURSE`.

- **August 2018 HF Alma**

Alma considers availability based on related records. Primo typically runs a dedup process, and so the availability of the records is often different than it is in Alma. You can configure whether Leganto uses Alma or Primo availability when displaying citations added using a Primo search scope. Configure the parameter **primo_availability_for_citations_added_from_primo (true/false)**. See [Configuring Whether to Display Primo Availability for Citations Added from Primo](#).

- **August 2018 Leganto**

A vertical bar now appears to the right of a citation when dragging and dropping the citation.

Drag and Drop Citation

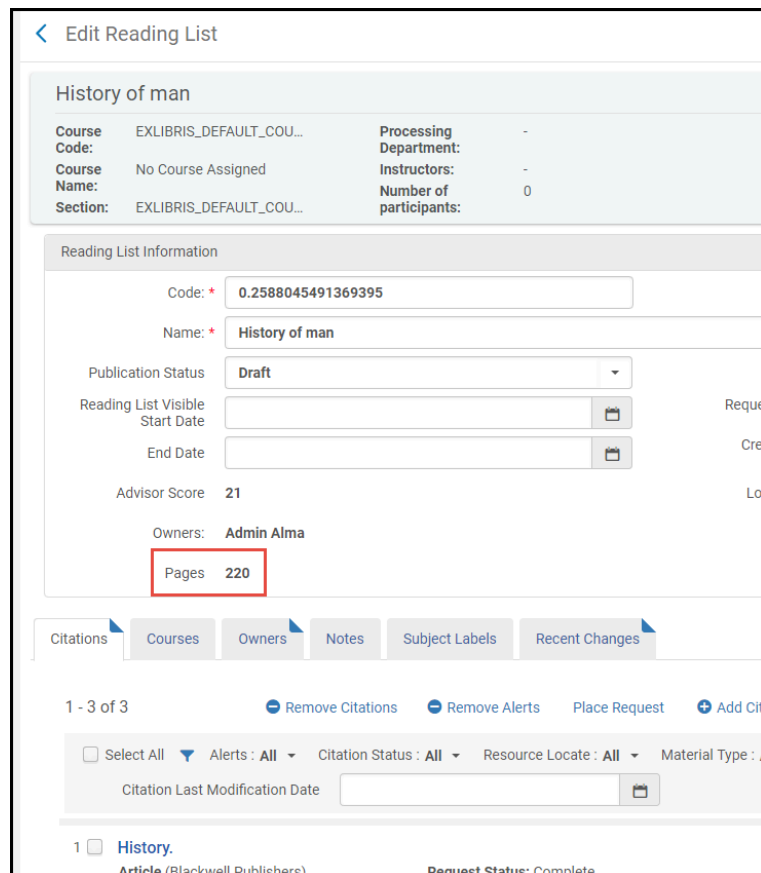

- **August 2018 Leganto**

Continuing our enhancements for multiple courses associated to a single reading list, the citation page now displays the correct course code for citations in these lists when accessed from a CMS.

- **August 2018 Alma SF: 00520052**

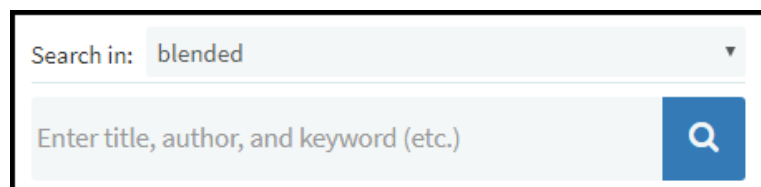

When enabled, the sum total of all pages of all citations appears at the top of the Edit Reading List page. The total

includes the total pages of each citation that has pages defined. The total is determined from the **Start Page** and **End Page** fields; if either of these is not defined, the total is determined from the **Pages** field. Citations without pages, or whose pages cannot be parsed by Alma, are not included in the total. To enable this, set the **display_page_count** parameter to **true**. See [Configuring Whether the Total Pages of All Citations in a Section or Reading list Appears](#).

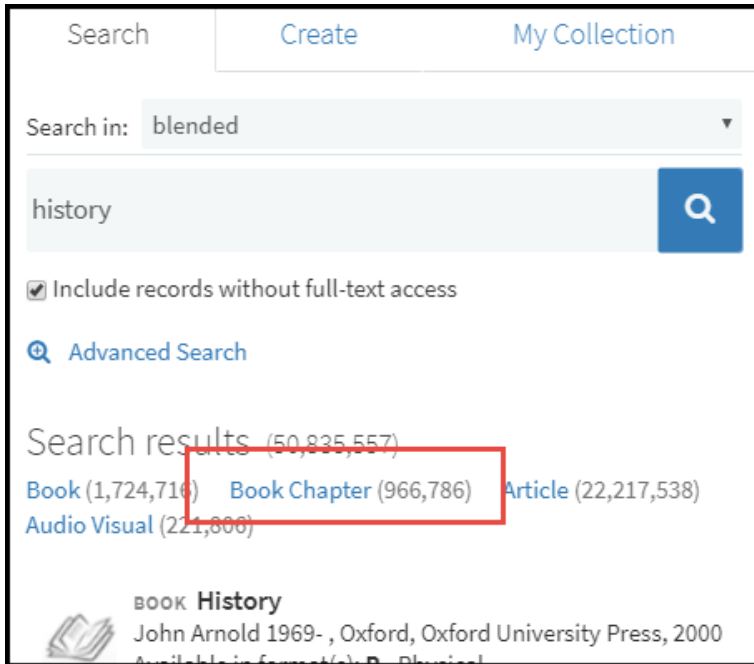

Total Pages for Reading List

- **August 2018 Leganto**
To increase response time, when selecting a course to associate to a reading list, only up to thirty courses matching your search string appear in the drop-down menu. To view other courses, enter a more specific search string.
- **August 2018 Leganto**
Description was added as a search field on the Find Lists page.
- **August 2018 Leganto**
Additional information - Second extract permissions - is now returned with the CLA permissions, when available.
- **August 2018 Leganto**
The search new resources input field UI was enhanced to be clearer and larger.

Search Input Fields in Leganto

- **August 2018 Leganto SF: 00544982**
Book Chapter was added as a facet in the search results.

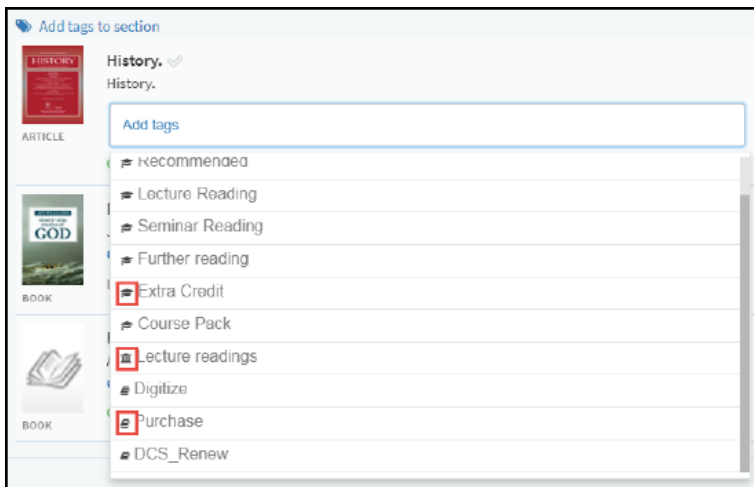

Search Results in Leganto

- **August 2018 Leganto**

Idea Exchange SF: 00544982

Librarians (only) can now add a third kind of tag, **Library-Internal** tags, to sections and citations. The existing **Library** tag type was renamed **Instructor-Library**. In the following figure, **Extra Credit** is a **Public** tag, **Purchase** is an **Instructor-Library** tag, and **Lecture Readings** is a **Library-Internal** tag.

Citation Tags in Leganto

- **August 2018 Leganto**

NERS Enhancement (ID #5912)

Librarians (only) can now set the reading list status when editing the reading list in Leganto. Librarians also see the reading list status in the reading list header.

Title: History of man

Idea Exchange

When configured by your library, you are presented with copyright declaration options when uploading a file while manually creating a citation.

The screenshot shows a file upload form with the following fields and options:

- Navigation: Search, Create, My Collection
- Title: _____
- Author: _____
- Type: Image
- Source: _____ + Add source
- Publisher: _____
- Publication Date: _____
- File name: asp.png
- Copyright Options (highlighted in red):**
 - Course faculty own the intellectual property rights for this content or the content is **Public domain** or **Open Access**
 - This file was authored by me and does not require copyright clearance
- Public note: _____
- More item details ▾
- Add to list Add to bag
- Section: week 1
- Buttons: DISCARD, ADD

File Upload Copyright Options

- **July 2018 Leganto SF: 00537019**
Collaborator names now appear without their primary IDs.

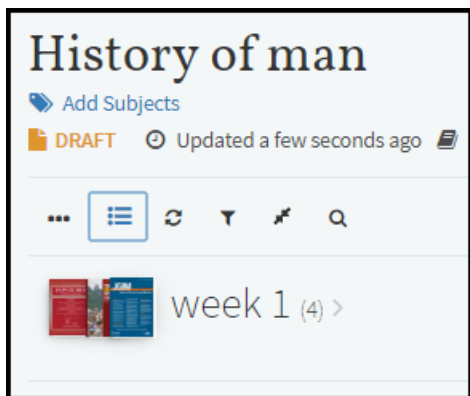

The screenshot shows the 'Manage collaborators' interface with the following elements:

- Header: Manage collaborators
- Existing collaborators:
 - Admin Alma (with 'Can manage list' and close icon)
- Invite new collaborators:
 - Search input: david
 - Dropdown list:
 - David Barkats - Faculty (highlighted)
 - David Brown
 - David Hume
 - David Parker
 - Nina Keren-David
 - SEND INVITATION button

Manage Collaborators

- **July 2018 Leganto**

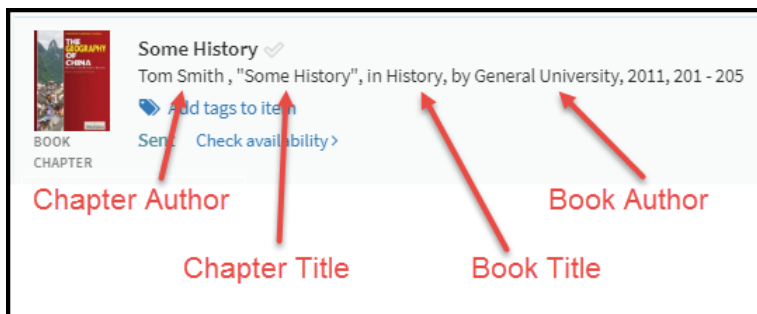

When a section is collapsed, the image before the section name now displays up to three overlapping thumbnails. In addition, the number of citations in the section appears in parentheses.

Collapsed Section

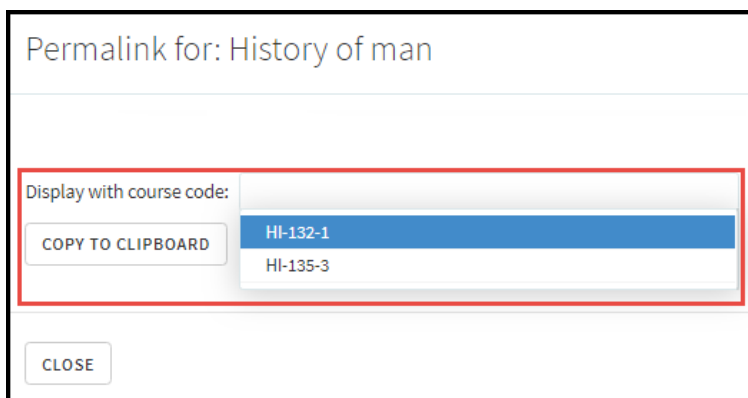

- **July 2018 Leganto**

The display of information on the Reading List page for a book chapter changed to appear as follows:

- **July 2018 Leganto**

In a continuation of the feature (multiple courses for reading lists) added in June, when creating a permalink to a list that is associated with multiple courses, you can specify that course associated with the permalink.

Course Selection for Permalink

In addition, whenever a new course is associated with a list, or disassociated with a list, the Due Back Date of the list is updated to be the latest default Due Back Date of all courses associated to the list.

- **June 2018 Leganto**

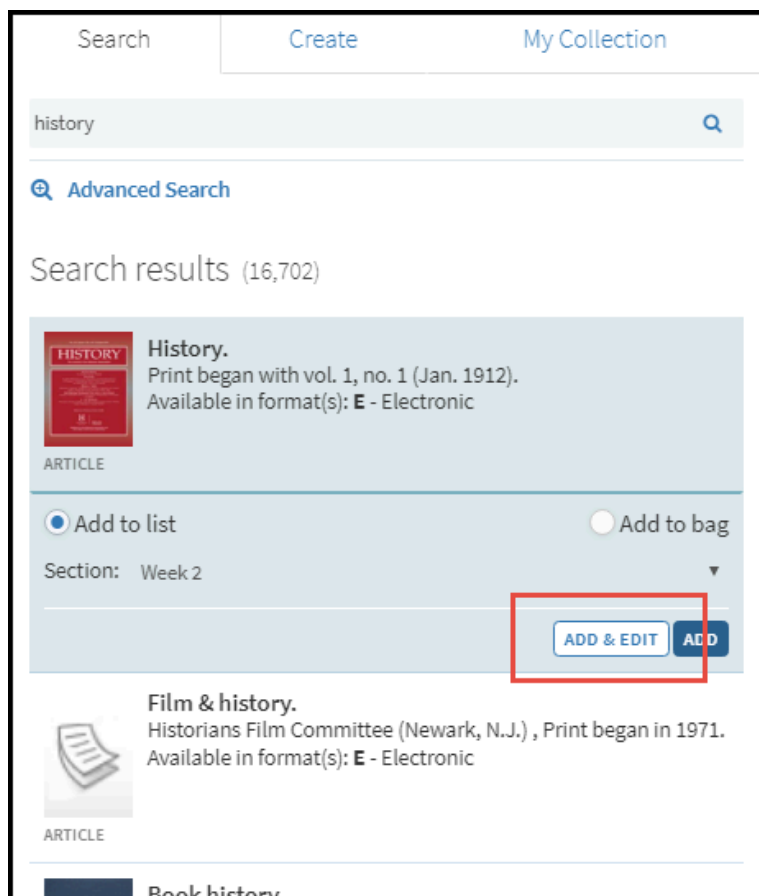

A confirmation dialog box was added before you permanently reorder all citations in a list.

- **June 2018 Leganto**

The Oxford Academic platform was added as a Cite It! supported site (as **Oxford University Press**).

- **June 2018 Leganto**

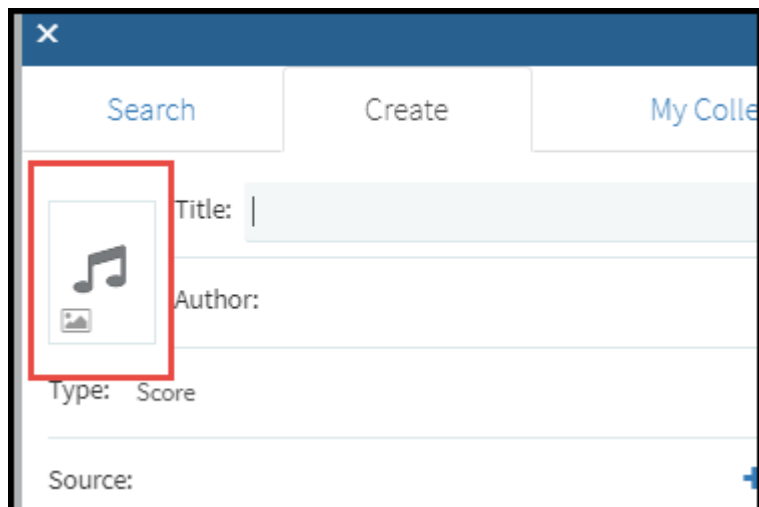

You can now add a citation from a right pane widget and then immediately display the edit widget so as to edit the citation. To do this, select **Add & Edit** instead of **Add** when adding the citation.

Search Widget in the Right Pane

- **June 2018 Leganto**

The secondary type **Score** now has its own icon.

Score Icon

- **SF: 00478108** **June 2018 Leganto**

To get a valid permalink to the Find Lists page, hover your mouse over the Find Lists title, select the small icon that appears, and copy the permalink to your clipboard. See the following video for an example.

Your browser does not support the video tag.

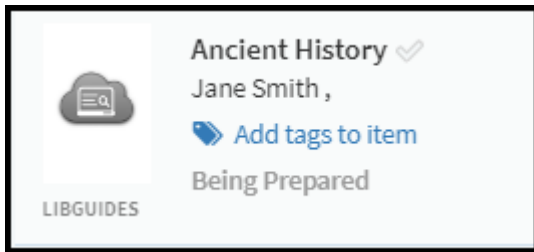

Copying Find Lists Permalink

- **May 2018 Leganto**

When Leganto is embedded, the user menu is now called **User Menu** instead of the user's name, so as to avoid appearing similar to the user menu in the CMS.

- **May 2018 Leganto**

Citations added using Cite It! from a "LibGuides" URL (for example, `libguides.lib.uni.edu/...`) are now assigned the secondary material type **LibGuides**, by default.

Libguides Citation

- **May 2018 Leganto**

A user can now select **Show More** to see debugging information if they experience a problem when trying to log into Leganto from the CMS by means of an LTI integration profile. (Until now, the user only saw the response code.)

Primo Central Material Type Filters

- **Jan 2018 Leganto**
When a reading list is published for all students at the institution or for anyone, but the course materials are restricted to a lesser group of people, this restriction does not apply to the source URL, which remains available to all students, regardless of the material restriction settings.
- **Jan 2018 Leganto SF: 00462157**
BIBSYS Brage was added as a supported Cite It! site.
- **Jan 2018 Leganto**
When enabled, instructor names were added to the tooltip when hovering your mouse over a course name.
- **Jan 2018 Leganto**
You can now search on the Find Lists page even if you do not enter a search string. Changing a search parameter refreshes the search. The search results are limited to 100 items.
- **Jan 2018 Leganto**
You can now select a Creative Commons license to apply to a reading list when editing the reading list.

Title: Human Biology

Description: Basic concept of Human Biology

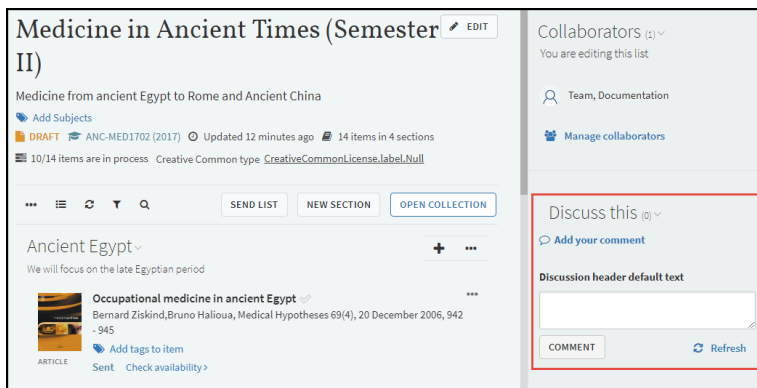

Creative Commons License:

List visible only during these dates: Start date To End date

Edit Reading List

- **Jan 2018 Leganto**

A discussion area is now available at the reading list level.

Discussion Area in the Reading List

- **August 2018 Alma SF: 00323060**

To enable and configure course rollover for instructors, see [Enabling Instructor Rollover](#).

- **August 2018 Alma SF: 00463479 00343562 00404230**

To configure the default sort order for instructors and/or students, set the parameters **default_list_sort_instructors** and/or **default_list_sort_students**; see [Configuring the Default Reading List Sort Order for Instructors and Students](#).

- **August 2018 Alma**

Idea Exchange SF: 00463479 00343562 00404230

The existing **Library** tag type was renamed **Instructor-Library**. A new tag type, **Library-Internal**, was added and is visible only by librarians (in Alma and Leganto). See [Configuring Citation and Section Tags](#).

- **August 2018 Alma**

NERS Enhancement (ID #5806)

You can now view and edit the default mapping between Primo PNX fields and Leganto citation fields on the Leganto Primo Mapping mapping table; see [Field Mapping from Primo PNX to Leganto Citations](#). Note that **language** was removed from Primo PNX mapping.

- **August 2018 Alma**

If a citation has multiple course codes, they now all appear in the Edit Citations page.

- **August 2018 Alma SF: 00546960**

The library discussion labels were restructured to enable configuring the reading list level separately from the citation level. The following labels were added:

- citation.library.discuss (default – Library discussion)
- list.library.discuss (default – Library discussion)
- citation.library.sidebar.add.comment (default – Add Your Comment)
- list.library.sidebar.add.comment (default – Add Your Comment)

- **July 2018 Alma SF: 00474279**

To control whether student discussions are all enabled or disabled, or whether instructors can enable or disable student discussions, configure the **student_discussions** parameter. See [Configuring Student Discussions in Leganto](#).

- **July 2018 Alma**

Leganto notifications are now available by API; see the [Developer's Network](#) for details.

- **July 2018 Alma**

User information is anonymized for CCC transactions once the license expires; see [Viewing Reports](#).

- **July 2018 Alma**

You can configure three additional fonts themes for Leganto using the **leganto_font** parameter; see [Configuring Headings and Text in Leganto](#).

- **July 2018 Alma**

You can configure the color of the left panel using the **leganto_left_color** parameter; see [Configuring Leganto Branding](#).

- **July 2018 Alma**

You can now enable or disable the following recommendation services: bX Recommendation Service, (new) Alexander Street Press (ASP), and shelf browsing (recommendations for items that are on the same or adjacent shelves). For this feature, the **recommendations** parameter replaces the **bx_recommendation** parameter. See [Configuring Recommendation Services](#). ASP recommendations appear in a pane at the list level and are based on the words in reading list name and description, section names and descriptions, and citation names. bX and shelf browsing recommendations appear on the citation page.

- **July 2018 Alma**

To configure the copyright options presented to an instructor when the instructor uploads a file while creating a citation, see [Uploading Files for My Collection or as Citations](#). This enhances the instructor's ability to self-declare copyrights on uploaded files.

- **July 2018 Alma**

In a continuation of the [Associating Reading Lists with Multiple Courses](#) feature added in June:

- As also noted for Leganto, whenever a new course is associated with a list, or disassociated with a list, the Due Back Date of the list is updated to be the latest default Due Back Date of all courses associated to the list.
- In Analytics, the correct course is counted for usage, where relevant.
- The list can be found when searching for any of its lists in Alma or Primo.

- **July 2018 Alma**

You can configure whether course's appear as their course name or course code in Leganto using the **course_display** parameter (**name** or **code**). See [Configuring How Courses Appear in Leganto](#).

- **July 2018 Alma**

Idea Exchange

You can disable the option in Leganto to connect a Leganto user account to Facebook by setting **facebook_support** to **false**; see [Disabling Facebook Connection Option](#).

- **July 2018 Alma**

Some changes were made to the required format of the file uploaded using the course loading integration profile. **Start Date** and **End Date** are no longer mandatory. The campus fields were combined. The documentation (see [Configuring Course Loading](#)) clarifies how to use the **Operation** and **Submit By Date** fields, and a new sample Excel File was added.

- **June 2018 Alma**

To enable [Compact List View](#) in Leganto, set **list_compact_view** to **true**.

- **June 2018 Alma**

To have sections appear collapsed by default when a user opens a reading list, set **sections_collapsed** to **true**. If the reading list contains only one section, it appears expanded, regardless of the value of this parameter.

- **May 2018 Alma SF: 00509874**

Students can be added as collaborators. A collaborator is automatically assigned the Instructor role if the user does not already have it.

- **May 2018 Alma**

To enable or disable instructors from editing the creative commons license for a reading list in Leganto, set the parameter **allow_instructor_CC_editing** to **true** or **false**).

- **May 2018 Alma**

When the new copyright management parameter **copyright_source** has a value (see [Configuring Leganto Copyright-Related Procedures](#)), the **Source for Copyright** field is mandatory when editing copyright attributes for a citation; see [Adding Citations to a Reading List](#). The value you enter for **copyright_source** is the value that is selected for **Source for Copyright** by default; use a single letter for the value, as described in the **copyright_region** parameter in [Configuring Other Settings](#). When left empty, the **Source for Copyright** field is optional and no value is selected by default.

- **May 2018 Alma**

List Notifications now also appear in the **Recent Changes** in the Edit Reading List page; see [Editing a Reading List](#).

- **May 2018 Alma SF: 00480283**

When adding a note in a reading list or citation, select **Instructor** as the **Type** to create a note that the instructor can view in Leganto, or select **Library** to create a note that is only visible to other librarians in Alma. Notes created by instructors in Leganto appear in the list with **Type = Instructor**. See [Editing a Reading List](#) and [Editing a Citation](#).

To support the new reading list-level notes, two new tasks were added to the tasks list (**Reading List - Assigned to Me - List has new note** and **Reading List - Unassigned - List has new note**) and **List has new note** was added as a new alert on the Edit Reading List page.

<type> (Instructor or Library) was added as a subfield of the <note> field in the reading list and citation APIs.

- **May 2018 Alma SF: 00485636**

To enable instructors to modify course information in Leganto (see above), set the **modify_course_details** parameter to **true**. See [Configuring Whether Instructors Can Create or Modify Courses](#).

- **May 2018 Alma**

For CCC license types **SPECIAL ORDER**, you can now select **Special order from CCC** in the row actions list and follow the instruction on the CCC website to obtain a license. See [Attaching a CCC License to a Citation](#).

- **May 2018 Alma**

You can now have information from the repository merged with the information in the citation when a match is found in the repository. The **override_bib_on_locate** parameter was changed to **on_locate**. The values for this parameter are **overlay** (formerly **true**), **ignore** (formerly **false**), and **merge** (merge information from citation and repository item). Existing institutions will have their current values changed to the new ones.

- **May 2018 Alma**

You can configure whether the Instructor role is added automatically to instructors when they enter Leganto from the CMS. See [Configuring Whether the Instructor Role is Added to Instructors Logging in from the CMS](#).

- **Mar 2018 Alma**

You can now enable or disable specific notification types for instructors and/or students. See [Enabling/Disabling Notification Types for Instructors and Students](#).

- **Mar 2018 Alma**

When a license from a licensing agency (such as from CCC) is created and attached to a citation, the citation's copyright status is changed to **Approved**. If the license is removed from the citation, the citation's copyright status becomes **Not Determined**. See also [Managing a Citation's Copyright Status](#).

- **Mar 2018 Alma SF: 00500971**

Additional options were added when [configuring LTI normalization rules](#). After matching an expression, you can now choose to change the matched expression to lowercase or uppercase, have a replace string added to the end of the

matched expression, or have a replace string added before the matched expression.

- **Feb 2018 Alma**

Non-funded licenses, where students can add items to a shopping cart, are now available for CCC. At any time, students can pay for all licenses in the cart using their Paypal account, after which the materials are available to them. For more information, see [Integrating Leganto with the Copyright Clearance Center](#) in the January release notes and [Integrating Leganto with the Copyright Clearance Center \(CCC\)](#) in the Leganto Administration Guide.

- **Feb 2018 Alma**

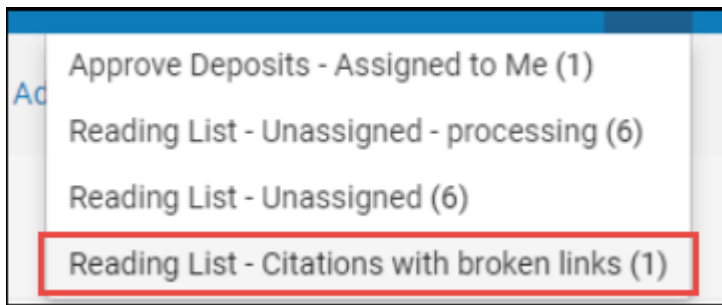

To configure the default Creative Commons license value for a reading list, see [Configuring the Default Creative Commons Value for a Reading List](#).

- **Feb 2018 Alma**

To ensure that the Primo filters accurately reflect the counts in Primo, set the parameter **primo_tab** to the desired Primo tab code. For more information on Primo tabs, see [Tabs](#) in Configuring Primo's Front End.

- **Feb 2018 Alma SF: 00480960 00501621**

The task **Reading List - Citation with broken links** was added to the tasks list. Selecting this task opens the Reading Lists Tasks List page on the **tab**, with the **Alert filter set to Citation Link Reported as Broken**.

Citations with Broken Links Task

- **Jan 2018 Alma**

You can disable subjects for reading lists; this removes the **Subjects** tab in the Edit Reading List page (see [Editing a Reading List](#).) and removes the ability to add or view subjects in Leganto. See [Disabling Reading List Subjects](#).

- **Jan 2018 Alma**

To enable viewing deleted lists in Leganto, see [Configuring What Happens to Deleted Lists](#).

- **Jan 2018 Alma**

When enabled, instructor names were added to the tooltip when the instructor hovers his or her mouse over a course name. See [Enabling Instructor Information in Leganto](#).

Resolved Issues

- **December 2018 HF Fulfillment - Course Reserves / Analytics**

The Leganto Student Usage Analysis report mistakenly displayed data for all courses and not for a particular instructor. This was fixed.

- **December 2018 Fulfillment - Course Reserves / APIs SF: 00527031 00568092 00569415**

When using the courses API, you couldn't pass a submit list by date value to the POST or PUT APIs. This was fixed.

- **December 2018 Fulfillment / Fulfillment - Course Reserves SF: 00569682**

Inactive reading lists appeared on the Scan in Items page and when adding items to a reading list after a repository search. This was fixed, and inactive reading lists no longer appear.

- **December 2018 Fulfillment - Course Reserves / Analytics SF: 00588748**

In Analytics, in the Leganto Student Usage subject area, when Usage Level was not equal to Citation, student type displayed ALL in the report. This was fixed, and now when Usage Level is not equal to Citation, student type is empty.

- **December 2018 Fulfillment - Course Reserves / APIs SF: 00581210 00593870**
When a course had multiple reading lists, only one reading list was retrieved by the Retrieve Reading Lists API. This was fixed.
- **November 2018 Acquisitions / Fulfillment - Course Reserves SF: 00431571**
When creating a purchase request from a citation, the request was not prefilled with the bibliographic metadata. This was fixed.
- **November 2018 Acquisitions / Fulfillment - Course Reserves SF: 00564640**
Data from a previous purchase request initiated from a citation is prefilled when making a new purchase request from a citation. This was fixed.
- **November 2018 Fulfillment - Course Reserves / Leganto SF: 00571794**
Rolled over citations did not retain their "disable resolving" selection. This was fixed.
- **November 2018 Fulfillment - Course Reserves / Leganto SF: 00580197**
The start date of a digitization request for a course that already started was a past date and not the current date. This was fixed.
- **November 2018 Fulfillment - Course Reserves SF: 00570451 00597178**
Citations associated to a reading list with multiple courses did not show up in Primo VE. This was fixed, but will only appear after a re-indexing: either a full re-index, or after a specific citation is changed.
- **November 2018 Fulfillment - Course Reserves / Leganto SF: 00587868**
You could not search for the default course (**EXLIBRIS_DEFAULT_COURSE**). This was fixed.
- **November 2018 Fulfillment - Course Reserves SF: 00588206**
The course loader integration profile failed if the campus field did not include the number of participants. This was fixed.
- **November 2018 Fulfillment - Course Reserves SF: 00595488**
The Reading Lists Task List page was slow to load when there were many reading lists. The performance was improved.
- **October 2018 HF Fulfillment - Course Reserves SF: 00606867**
Since the Oct release, **External Link** no longer appeared in the **Other** tab on the Edit Reading List page. This was fixed.
- **October 2018 Fulfillment - Course Reserves SF: 00585065 00590006 00593856 00593926**
A new course caused errors and page issues on the Courses page. This was fixed.
- **October 2018 Fulfillment - Course Reserves SF: 00509166**
When doing a resource locate, for ISBN match, 020\$\$a is now preferred. If there is no match, 020\$\$z is used.
- **August 2018 HF Fulfillment - Course Reserves**
Data did not appear for library-internal citation tags in Analytics. This was fixed.
- **August 2018 Fulfillment - Course Reserves SF: 00373509**
The course deletion confirmation message did not include the number of reading lists. This was fixed.
- **August 2018 Fulfillment - Course Reserves SF: 00371728**
After removing an associated course from a reading list, the CNO tags associated with the bibliographic records still appeared after the next Publishing to Primo job (note that they were removed after running the Primo Republish Set of Titles job). This was fixed.
- **July 2018 Fulfillment - Course Reserves SF: 00338994 00495367 00523265 00526101 00463244**
When reassigning a reading list, the added note did not appear in the letter to the new operator. This was fixed.
- **July 2018 Fulfillment - Course Reserves SF: 00480067**

There was sometimes a large discrepancy between the number of active students and the number of students that viewed the citation in Leganto Student Usage in Analytics. This was fixed.

- **July 2018 Fulfillment - Course Reserves SF: 00505055 00465359 00521967**
When adding a repository citation to a reading list, there was a problem changing the search scope on the search screen. This was fixed. You can now select any relevant search scope.
- **July 2018 Fulfillment - Course Reserves SF: 00475608**
Not all Course Reserves \$So Searchable IDs were published to Primo. This was fixed.
- **July 2018 Fulfillment - Course Reserves SF: 00521070**
When exporting a reading list, the **Demand in Other Lists** and **Demand in Other Courses** columns contained incorrect values. This was fixed.
- **July 2018 Fulfillment - Course Reserves SF: 00530319 00526210**
For some citations, the Link Resolver link did not appear in the Other tab for the citation on the Edit Reading List page. This was fixed.
- **July 2018 Fulfillment - Course Reserves SF: 00511625**
A citation could not be added to a reading list if its title contained curly brackets { }. This was fixed.
- **July 2018 Fulfillment - Course Reserves, Administration and Infrastructure SF: 00544984**
In the persistent search, searching for requests by ISBN/ISSN was recently added but did not work; it was removed. Note that you can still search by ISBN/ISSN using a secondary search, such as on the Approval Requests List page.
- **June 2018 APIs / Fulfillment - Course Reserves SF: 00462168**
When creating a non-repository citation using the API, the citation data was overridden (as opposed to linked) after a successful locate. This was fixed.
- **June 2018 Fulfillment - Course Reserves SF: 00466963**
For repository citations, data from MARC fields 264 \$a and \$c are not mapped to the citation fields. This was fixed.
- **June 2018 Fulfillment - Course Reserves SF: 00509066**
The digitization profile rule parameter Total Copyright Work Percentage did not work correctly (there was a slight rounding error). It was fixed.
- **June 2018 Fulfillment - Course Reserves SF: 00520582**
The digitization profile rules chapter count/page count did not evaluate the count correctly. This was fixed.
- **June 2018 Fulfillment - Course Reserves SF: 00506713**
For a digitization request, Alma was unable to determine that there were previously approved requests for the same issue. This was fixed.
- **June 2018 Fulfillment - Course Reserves SF: 00524294**
When a user clicked Manage Fulfillment Options on the Edit Reading List Citation page and then clicked Cancel on the Manage Resource Options page, Alma incorrectly changed the citation's copyright status. This was fixed, and now clicking Cancel in this case does not change the citation's copyright status. In addition, clicking Cancel in this case now returns the user to the Edit Reading List page, rather than the Edit Reading List Citation page.
- **March 2018 Acquisitions / Fulfillment - Course Reserves SF: 00428326**
When a purchase request that was created from a reading list citation was edited, it was possible to update the bibliographic record. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00471821 00502100 00501093**
The date and time of creation for a citation was off by two hours in the Alma UI. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00453767**
Fields were not aligned in the UI in the staff digitization request form. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00487636 00486880 00499885 00467130 00491168 00511406**
When searching for an instructor to add to a course, Alma displayed each user twice. This was fixed.

- **March 2018 Fulfillment - Course Reserves SF: 00489644**
A duplicated reading list always displayed Ex Libris for Created by and Modified by. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00420391**
In Alma, an error appeared when trying to make certain changes in a duplicated citation before the citation was saved. These options are now disabled until the duplicated citation is saved.
- **March 2018 Fulfillment - Course Reserves SF: 00488792**
A resource locate did not update the citation material type according to the located record. This was fixed. if the citation is an article and the located record is a journal, then the type is not updated from the record.
- **March 2018 Fulfillment - Course Reserves SF: 00490413**
An error appeared when searching for citations with an apostrophe or the word 'where'. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00470996**
In the user drop-down to add owners to a reading list, the results were duplicated. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00492178 00507832**
When adding a citation tag in the code table, the default tag type was Library, which was not configured, and no possible values. Changing it to public also showed no possible values. Only after changing it to public, exiting the table, and re-entering it did you see the values. This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00478568 00480136**
The title appeared twice in the exported file from the Reading Lists Task List page This was fixed. In addition, material type and author were exported to the same column. They are now separated into two columns.
- **March 2018 Fulfillment - Course Reserves SF: 00483653**
The alert for citations, Demand in other lists, was not displayed in red (as it had been in the classic UI). This was fixed.
- **March 2018 Fulfillment - Course Reserves SF: 00376874**
The Library and Access Rights Policy were not pre-filled for a digitization request. This was fixed.
- **February 2018 Fulfillment - Course Reserves SF: 00450847**
After adding a brief citation to a reading list with status **Completed**, and then clicking **Back**, the reading list status changed to Being Prepared. If you clicked Save, the status remained Completed. This was fixed and the status does not change to Being Prepared in this case.
- **February 2018 Fulfillment - Course Reserves SF: 00465764 00465359 00460612 00480911**
When adding a repository citation to a reading list in the new UI, only the All Titles search was available. This was fixed, and now all repository searches are available.
- **February 2018 Fulfillment - Course Reserves SF: 00486880**
When trying to add an instructor on the Manage Course information page, Alma returned to the **Course Information** tab instead of adding the instructor to the instructor field on the correct tab. This was fixed.
- **February 2018 Fulfillment - Course Reserves SF: 00486220**
Clicking Items when displaying the physical items of a citation resulted in an error. This was fixed.
- **February 2018 Fulfillment - Course Reserves SF: 00475310**
The Created By field for a citation was always Ex Libris. This was fixed.
- **January 2018 Fulfillment - Course Reserves SF: 00449401 00445309**
The Availability and Citation Details tabs could not be closed on the Edit Reading List page. This was fixed.
- **January 2018 Fulfillment - Course Reserves SF: 00420391**
An oops error was generated when you tried to make certain changes in new (duplicated) citations before saving the citation. The UI elements to perform these actions are now disabled until the citation is saved.
- **January 2018 Fulfillment - Course Reserves SF: 00476817**
The table action Remove Alerts on the Edit Reading List page resulted in an error. This was fixed.
- **January 2018 Fulfillment - Course Reserves**

- Title and section details were missing from the Bulk Citation Inventory Enrichment job report. This was fixed.
- **January 2018 Fulfillment - Course Reserves SF: 00487347**
On the Reading List Tasks List page, reading lists associated with a course were not alphabetically sorted. This was fixed.
 - **January 2018 Fulfillment - Course Reserves SF: 00474420**
When creating a citation, the entire MARC field 245 appeared as the title, including \$. This was fixed.
 - **January 2018 Fulfillment - Course Reserves SF: 00473337**
Unsaved information entered into the **Copyright Attributes** tab on the Edit Reading List Citation page did not remain when navigating to another page. This was fixed.
 - **January 2018 Fulfillment - Course Reserves SF: 00468427 00465668**
The Citation has a new note alert remained even when the last note was removed. This was fixed.
 - **January 2018 Fulfillment - Course Reserves SF: 00489563 00422853**
When a reading list was duplicated, citations which were not linked to repository records did not appear in Analytics reports. This was fixed.
 - **December 2018 HF Alma**
A citation tagged in Leganto was not filtered correctly in Alma. This was fixed.
 - **December 2018 HF Leganto SF: 00628372**
The last two citations in a reading list could not be removed when using the Hebrew language. This was fixed.
 - **December 2018 Alma**
When using the course API and creating a new citation, you couldn't define the section under which the citation should be created. This was fixed.
 - **December 2018 Leganto SF: 00603678 00606634 00614529**
Export to Word did not work since the October release. This was fixed.
 - **December 2018 Alma SF: 00540565**
After selecting to customize a row on the Labels configuration page, the page scrolled to the top. This was fixed.
 - **December 2018 Leganto SF: 00563566**
Section dates did not take into account different time zones. This was fixed.
 - **December 2018 Leganto SF: 00568832**
Different due dates sometimes appeared in the reading list and citation details pages. This was fixed.
 - **December 2018 Alma SF: 00570475 00589862**
If the owner of a list was set using `auto_set_instructors_as_owners`, the owner could not find the list when searching. This was fixed.
 - **December 2018 Leganto SF: 00578553 00589778**
There were some display issues in Alma with lists that had many citations. These were fixed.
 - **December 2018 Leganto SF: 00580984**
There was an error when parsing a digitization request when the total pages had square brackets. This was fixed.
 - **December 2018 Leganto SF: 00549553**
Some searches against Primo failed. This was fixed.
 - **December 2018 Leganto**
The incorrect version of the location names appeared when printing a reading list. This was fixed.
 - **December 2018 Leganto SF: 00585381**
Some readings were inaccessible when using the JAWS screen reader. This was fixed.
 - **December 2018 Leganto SF: 00583914**
When an instructor rolled over a list, the manage digital representations setting was not copied. This was fixed.

- **December 2018 Leganto SF: 00587556 00612962**
The Back to top icon sometimes overlapped the options button of the final section heading. This was fixed.
- **December 2018 Alma SF: 00579004 00588271 00609470**
When sections_collapsed was set to true, a permalink to a section did not show the section. This was fixed.
- **December 2018 Leganto SF: 00578594 00618007**
The Reports tab displayed an error when viewed in Internet Explorer. This was fixed.
- **December 2018 Alma**
Push To Leganto from Primo did not support the auto_set_instructors_as_owners parameter when it was set to true. This was fixed.
- **December 2018 Leganto SF: 00587589**
The side menu buttons sometimes overlapped with the logo in Leganto. This was fixed.
- **December 2018 Leganto SF: 00588808**
For citations with public notes that included new line breaks, exporting to PDF had some issues. This was fixed.
- **December 2018 Leganto**
Librarians and course organizers could not search in Find Lists for lists published for course students only. This was fixed.
- **December 2018 Leganto**
Find List sometimes did not return a list that was associated to multiple courses. This was fixed.
- **December 2018 Leganto SF: 00595164**
For a citation associated with a bibliographic record with physical inventory that also had a related record with electronic inventory, selecting View Online from the reading list page resulted in an error. This was fixed.
- **December 2018 Leganto**
Sometimes the Sign in for more options link on the citation details page did not redirect to the correct authorization system. This was fixed.
- **November 2018 HF Leganto SF: 00569444**
Notification emails were sent twice when the user was both a collaborator and an instructor, and the "instructors as owners" flag was set to true. This was fixed.
- **November 2018 Leganto SF: 00550475**
Digitization links appeared for electronic citations, but should only appear for physical citations. This was fixed.
- **November 2018 Leganto SF: 00471737 00562722 00566922**
A watched reading list appeared as published instead of watched. This was fixed.
- **November 2018 Leganto SF: 00566769**
100 appeared as the number of matching lists on the Find Lists page even when there were more than 100 matching lists. Now a message appears indicating that there are more than 100 lists.
- **November 2018 Leganto SF: 00573185**
There was no option to clear a creative commons license on a citation. This was fixed.
- **November 2018 Alma SF: 00573781**
The **Subjects** drop-down appeared on the Find Lists page even when **enable_subject_tags** was set to **false**. This was fixed.
- **November 2018 Alma SF: 00575473**
Librarians could not see the student discussion in Leganto, This was fixed.
- **November 2018 Alma SF: 00577633**
A citation's uploaded file could not be downloaded in Alma if the filename contained special characters, such as +. This was fixed.
- **November 2018 Leganto SF: 00578929**

The wrong label appeared for the student discussion at the list level. This was fixed.

- **November 2018 Leganto SF: 00578678 00579000 00581960**

When exporting to PDF or printing in Hebrew, the reading list name and section were reversed, the text was mixed with English, and the numbers were scrambled. This was fixed.

- **November 2018 Leganto SF: 00579250**

When an instructor rolled over a reading list, the student discussion was not copied as expected. This was fixed.

- **November 2018 Leganto SF: 00579251**

When an instructor rolled over a reading list, the user doing the roll over became the list owner, instead of as configured. This was fixed.

- **November 2018 Leganto SF: 00582694**

The handle to drag sections was inconsistently appearing. This was fixed.

- **November 2018 Leganto SF: 00584587 00572485 00572486 00572520 00590334**

A user could not add certain electronic journals or books to a Leganto reading list. This was fixed.

- **November 2018 Leganto SF: 00604182**

In the right sidebar, **Create Citation** appears when editing a citation. This was fixed.

- **October 2018 HF Leganto SF: 00606311**

Since the Oct release, when duplicating a list, Leganto changed the Complete status of the citations to Being Prepared. This was fixed.

- **October 2018 HF Alma SF: 00607391**

Since the Oct release, a citation added to a list with more than 20 citations in Leganto did not appear in the list in Alma. This was fixed.

- **October 2018 HF Alma SF: 00606927 00607393**

Since the Oct release, after setting reading_list_citation_sorting to INSTRUCTORORDER, the citations in Alma were not ordered in the same way as they were in Leganto. This was fixed.

- **October 2018 Leganto SF: 00589629**

The PayPal button did not appear in the shopping cart when trying to purchase licensed material. This was fixed.

- **October 2018 Leganto**

Some citations displayed an extra "0" after the year. This was fixed.

- **October 2018 Leganto**

To improve the quality of Alexander Street Press recommendations, recommendations only appear once there are at least five citations in the list.

- **October 2018 Leganto SF: 00482403**

Some labels were not translated properly when exporting to Word. This was fixed.

- **October 2018 Leganto SF: 00493089**

uResolver links are no longer included when exporting to Word.

- **October 2018 Leganto SF: 00528804**

DVDs appeared as Book when searching the library. This was fixed.

- **October 2018 Leganto SF: 00533901**

PDF exports now include the same fields that Word exports have, and the fields are labeled.

- **October 2018 Leganto SF: 00549098**

Some dialog boxes and messages appeared incorrectly on lower resolution screens, such as laptops. This was fixed.

- **October 2018 Leganto SF: 00550802 00557277**

The chapter title appeared twice for book chapter citations in the reading list page. This was fixed.

- **October 2018 Leganto SF: 00549382 00585241**

Digital representations were not available in Leganto when they should have been. This was fixed.

- **October 2018 Leganto SF: 00549479**
Cite It! did not pull all of the information from Blackwells. This was fixed.
- **October 2018 Leganto SF: 00555970**
When searching in Alma in Leganto, suppressed records did not appear as suppressed. This was fixed.
- **October 2018 Leganto SF: 00557098**
After adding a file, the scroll bar did not work correctly. This was fixed.
- **October 2018 Leganto SF: 00557265**
The Add Items section overlapped the new section button when creating a new list. This was fixed.
- **October 2018 Leganto SF: 00547673**
An incorrect label appeared in My Collection for pages. This was fixed.
- **October 2018 Leganto SF: 00559473 00559473**
Some small changes were made to the search pane. For example, the X to delete a search string now appears in all browser. Focus was fixed in some cases.
- **October 2018 Leganto SF: 00558509**
The right side of the search results was sometimes cut off, slightly. This was fixed.
- **October 2018 Leganto SF: 00562232**
After changing a citation from book chapter to book, the page number fields continued to appear in the citation page. This was fixed.
- **October 2018 Alma SF: 00557616**
Publication date was only available in Analytics when the list was published from Leganto. It is now available also when the list is published from Alma.
- **October 2018 Leganto SF: 00554092**
1. When exporting to word, only first author was exported. Now all authors are exported. 2. When exporting to AMA, all citations were numbered 1. This was fixed.
- **October 2018 Leganto SF: 00562257**
When using LTI Field Normalization, in some cases the requested value was not replaced correctly. This was fixed.
- **October 2018 Alma SF: 00566107**
The Recent Changes tab on the Edit Reading List page sometimes displayed an error. This was fixed.
- **October 2018 Alma SF: 00558493**
After an instructor selected Send to Library, the copyright status changed to Not Determined. This was fixed.
- **October 2018 Leganto SF: 00566106 00566998**
Leganto on an Apple device did not display several left menu options. This was fixed.
- **October 2018 Leganto SF: 00566930**
The library discussion pane appeared to students; it should only appear to instructors. This was fixed.
- **October 2018 Alma SF: 00543486 00576392**

- **Jan 2018 Leganto SF: 00491993**
It was not possible to associate a course to a reading list in Leganto on Internet Explorer. This was fixed.
- **Jan 2018 Leganto SF: 00493775**
When arriving from a CMS, if the course code contained spaces, lists associated to the course did not appear in Leganto. This was fixed.
- **June 2018 Alma SF: 00485967**
There was a delay of several seconds when displaying citation availability. This was fixed.
- **June 2018 Alma SF: 00520081**
The **Journal Title** field of **Eoffprint** type citations did not appear in Alma. This was fixed.
- **Mar 2018 Alma SF: 00496261**
On the reading list page, availability was sometimes incorrect when two or more related records were in the same list. In other cases, physical location was missing, also due to related records. These issues were fixed. Reminder: To enable electronic availability for physical items that are related to electronic items, you must set **Enable related record services** to **Yes** for the record. When set to **No**, physical items that are related to electronic items only display their physical availability.
- **Mar 2018 Alma SF: 00489644**
A duplicated list always displayed **Ex Libris** for **Created by** and **Modified by**. This was fixed.
- **Mar 2018 Alma SF: 00492005**
When a citation has a note, the bibliographic record has a note, **move_source_url_on_locate** is set to **true**, and the resource is located, the bibliographic note will now replace the citation note and then the source URL note will be appended to this.
- **Feb 2018 HF Alma SF: 00508203**
Tags with visibility **Library** did not appear in Leganto. This was fixed.
- **Feb 2018 Alma SF: 00477222**
In physical availability, Hebrew text was aligned left. This was fixed.
- **Feb 2018 Alma SF: 00475310**
The **Created By** field for a citation was always Ex Libris. This was fixed.
- **Feb 2018 Alma SF: 00491734**
In a collaborative network implementing a Network Zone, it was not possible to add records when using Other Formats and Editions. This was fixed.
- **Feb 2018 Alma SF: 00491714**
A notification was not sent when a librarian added a note. This was fixed.
- **Jan 2018 HF Alma SF: 00502910**
A request to the CCC with no author resulted in an error. This was fixed.
- **Jan 2018 HF Alma SF: 00500953**
Some CCC licenses would fail when trying to purchase the license. This was fixed.
- **Jan 2018 Alma SF: 00463350**
