

Can manage-33 be run for a Course library?

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

Can manage-33 be run for a Course Reserves (Course Reading) library?

Resolution

Yes. Customers have been running the manage-33 Service successfully for xxx30 libraries.

{Originally, there was a concern that the job might delete items linked to the xxx30 course doc records which were also linked to an xxx01 bib record (and, therefore, should *not* be deleted.) But it has been found that manage-33 does *not* delete items which are linked to the course doc record via an "ITM" z103_lkr_type, only those linked via an "ADM" z103_lkr_type. See the article [Bib, item, and course record connections](#) in regard to ITM- and ADM-type links.}
