
Maximum number of characters in tab_word_breaking column 4

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

We have added some non-breaking space characters (such as "\U+00A0") to our bib library tab_word_breaking, column 4, but they don't seem to be working. Is there a limit to the number of characters allowed in this column 4?

Resolution

As can be seen from the following line in the tab_word_breaking header, column 4 is limited to 50 characters:

```
! COL 4. 50; TEXT; ;  
! Parameters;
```
