

April 2018

New Features

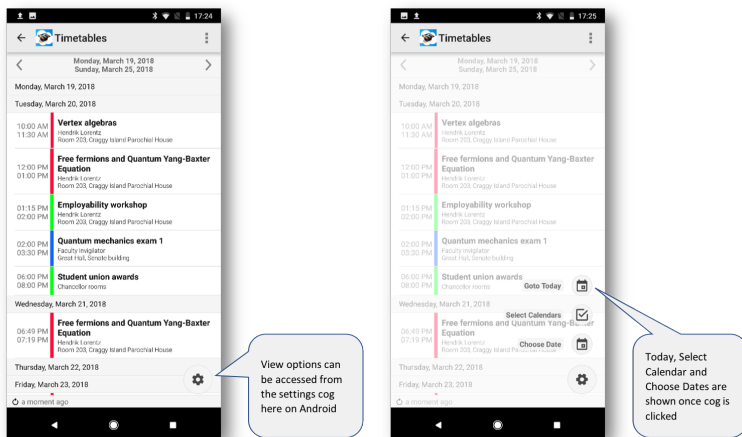

Blended Calendar

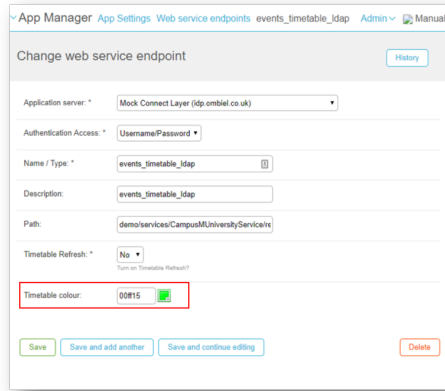

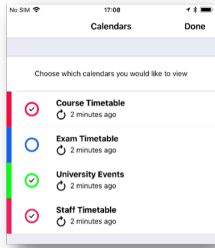

CampusM app calendars can now be viewed in a single blended view on both iOS and Android apps. The blended view overlays all calendars and has additional features as shown

The blended calendar view is available on both iOS and Android apps, as well as the iPad.

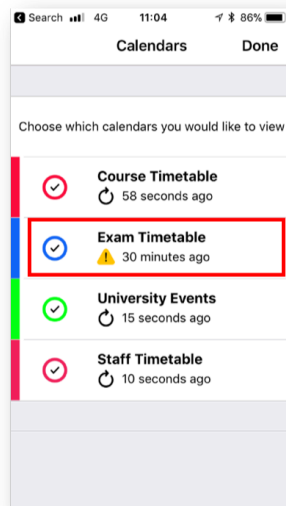

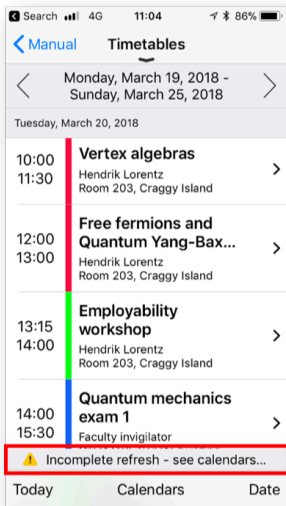

Calendars can be filtered in the calendars option, and configured in the App Manager for each web service end point:

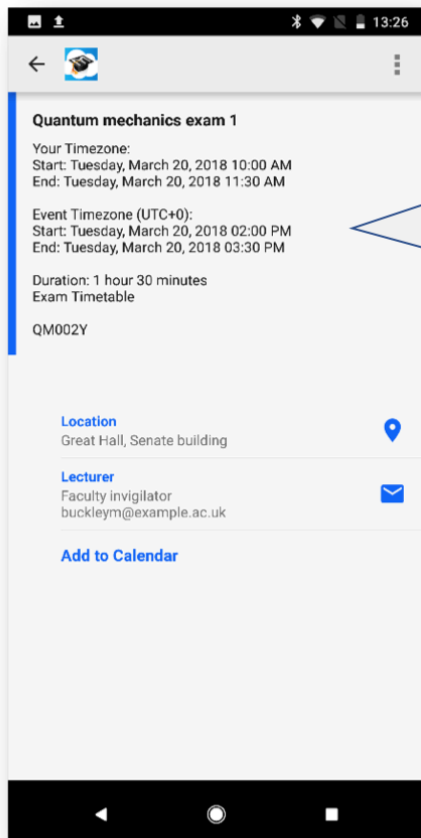

Stale Calendar Warning

Where a calendar hasn't been refreshed, perhaps due an issue with the university service, a warning message will be given:

Time Zones

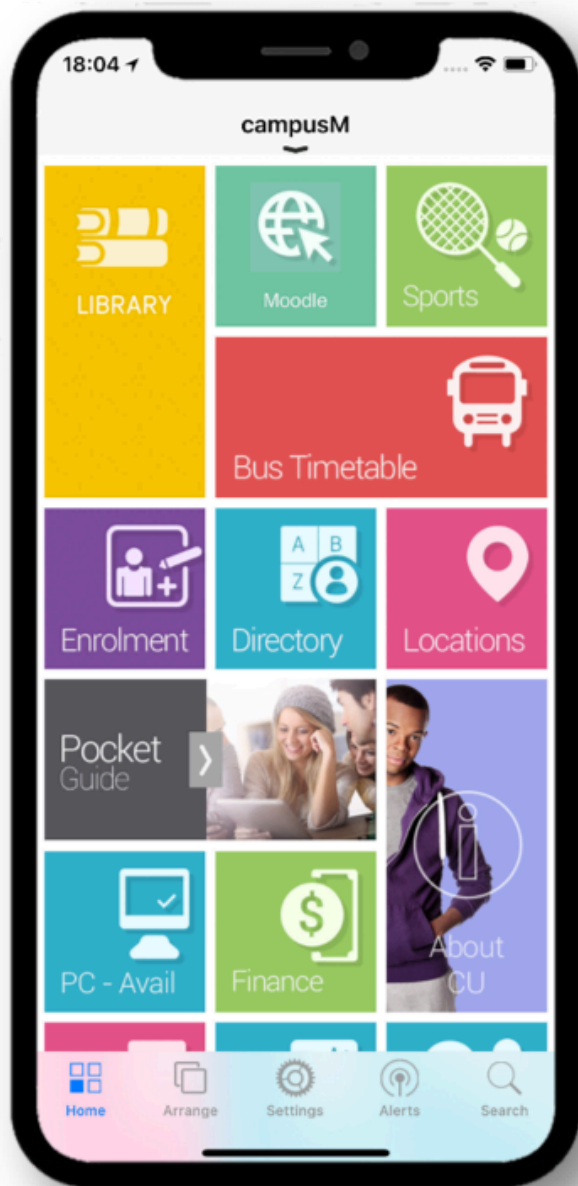

Blended calendar shows event time zones in both local and the event campus time zone, when these are different

For example, if a student has an exam in the UK but is away in New York on leave, the exam time is shown in both time zones

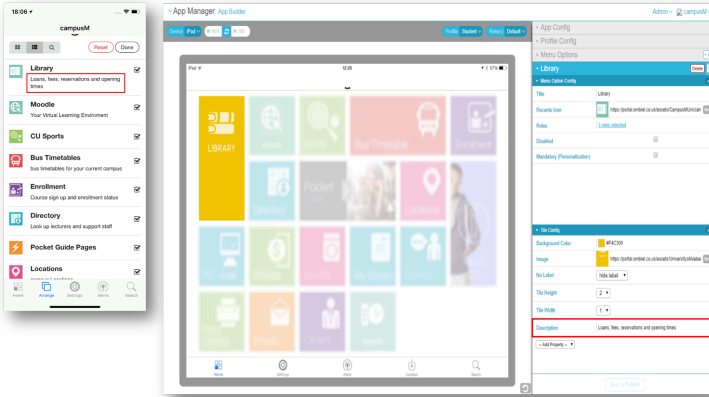

Migration to Xcode 9.2 and Support for iPhone X Screen

Apple set out the following guidance recently "From April 2018, all new iOS apps submitted to the App Store must be built with the iOS 11 SDK. All new apps for iPhone, including universal apps, must support the Super Retina display of iPhone X." All iOS apps are now built with Xcode 9.2 and have full compatibility for the iPhone X larger screen size (and notch).

Descriptions in Personalization list view

The Personalization list view now shows the tile descriptions, which can be set in App Manager as a tile property:

Resolved Issues

Issue	Affected Platform	Salesforce Case Number(s)
Rounded edges not taking effect on live tiles	<ul style="list-style-type: none"> Web App 	N/A
Borders not appearing on Banner tiles	<ul style="list-style-type: none"> iOS App Android App Web App 	N/A
Mandatory tile option not available in March release of App Builder	<ul style="list-style-type: none"> App Manager 	<ul style="list-style-type: none"> 00494351 00523115 00425281 00524664 00525819
Location access permission being sought when not required	<ul style="list-style-type: none"> iOS App Android App 	N/A
'No phone no.' shown when phone number missing in event	<ul style="list-style-type: none"> iOS App 	<ul style="list-style-type: none"> 00518537
iOS app crashes when choosing alerts in "Receive Alerts" list	<ul style="list-style-type: none"> iOS App 	<ul style="list-style-type: none"> 00490052
