

## alert-batch-job-00 files printing (rather than being emailed)

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

For certain xxx50 jobs the alert-batch-job-00 files (describing the job's success/failure) are sometimes being printed when they should be emailed.

### Resolution

The util-g-2 last-file-number for this xxx50 ADM library was specifying a prefix of "usm50". Changing it to "xxx50" corrected the problem.
