
Make clickable URLs appear in OPAC Standard Format

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

Our 856 fields appear in the MARC tags and Name tags formats, but not in the "Standard format" (the "Full + Link" format). Also, we want them to be "clickable" (-- rather than requiring that the user paste them into a browser session).

Resolution

[Note: It is not possible to have clickable hyperlinks appear in the MARC tags and Name tags formats.]

In regard to the Standard "Full + Link" format....

The `edit_doc_999.lng` has had a 856 "G" line (for GUI search) but no 856 "W" (Web OPAC) line.

The following line was inserted into the "W" section at the bottom of the table:

```
## 856##           D LElectronic Location Y M     E       W
```

Then restart the `www_server`.
